A CNC stone processing machine is a computer-controlled tool used to cut, engrave, drill, and shape stone materials with high precision and automation. Designed for working with natural and engineered stones such as granite, marble, and quartz, it integrates computer numerical control (CNC) technology to execute complex designs, custom cuts, and 3D sculpting with minimal manual input.

These machines typically include a robust gantry structure, rotating spindles, automatic tool changers, and high-pressure water or dust suppression systems. They are widely used in countertop fabrication, stone engraving, monument carving, and architectural detailing, significantly improving production speed, consistency, and material utilization in modern stone workshops.
