The global CNC Tap and Thread Grinder market size is predicted to grow from US$ 300 million in 2025 to US$ 397 million in 2031; it is expected to grow at a CAGR of 4.8% from 2025 to 2031.

CNC tap and thread grinder is a high-precision device used for machining and trimming thread tools, especially taps and thread cutters. It precisely controls the grinding process through the CNC system, and can efficiently and accurately machine various types of threads, including internal and external threads, pitches, thread angles, etc. CNC tap and thread grinders usually use multi-axis CNC technology, which can achieve multi-directional linkage to meet the processing needs of complex thread shapes. Compared with traditional thread grinders, CNC versions have higher processing accuracy, automation and production efficiency, which can greatly improve production efficiency, reduce manual intervention, and adapt to more complex production tasks.

United States market for CNC Tap and Thread Grinder is estimated to increase from US$ million in 2024 to US$ million by 2031, at a CAGR of % from 2025 through 2031.

China market for CNC Tap and Thread Grinder is estimated to increase from US$ million in 2024 to US$ million by 2031, at a CAGR of % from 2025 through 2031.
