Abstracts

The global CO2 Compression Transport Pipelines market size is predicted to grow from US\$ 2187 million in 2025 to US\$ 6866 million in 2032; it is expected to grow at a CAGR of 17.9% from 2026 to 2032.

CO2 Compression Transport Pipelines refer to onshore or offshore pipeline systems within the carbon capture, utilization and storage value chain that continuously transport carbon dioxide captured from industrial production, oil and gas processing, power generation, low-carbon hydrogen and ammonia production, bioenergy, waste management or direct air capture facilities, following dehydration, purification, compression and pressurization, from the custody transfer point of a capture facility to a gathering hub, utilization facility or custody transfer point at a geological storage site. These systems comprise inlet compression facilities, intermediate booster facilities, gathering lines, trunk pipelines, laterals and delivery pipelines, together with directly associated valves, fittings, cooling and pressure-control equipment, metering equipment, pressure-relief and isolation devices, control systems, leak-detection systems and pipeline integrity management facilities. They may transport carbon dioxide in compressed gaseous, dense, supercritical or liquid phase and may be configured as point-to-point pipelines, shared cluster networks or regional trunk networks.

Key Findings

North America remains the largest established market because of its extensive operating carbon dioxide pipeline network

Engineering and construction services currently represent the largest revenue segment

as new transport networks enter implementation

Shared cluster networks are replacing isolated point-to-point projects as the preferred model for new infrastructure

Oil and gas processing forms the established demand base while cement hydrogen and power drive new projects

European offshore storage networks and cross-border carbon dioxide infrastructure are creating the strongest emerging opportunities

Market Trends

CO₂ Compression Transport Pipeline is transitioning from dedicated pipelines connecting a single source with an enhanced oil recovery site toward multi-user networks linking industrial clusters with permanent geological storage. New projects increasingly adopt shared gathering systems, oversized trunk pipelines, standardized connection specifications and open-access operating models, allowing additional emitters to connect after initial commissioning. Dense-phase transport remains the preferred configuration for high-capacity, long-distance pipelines, while gaseous-phase systems retain relevance for smaller gathering networks and liquid-phase solutions are being assessed for selected offshore and integrated transport chains. Technology development is concentrating on impurity management, fracture control, decompression modelling, corrosion resistance, leak detection, automated isolation and real-time integrity monitoring. Offshore projects are also creating demand for high-strength line pipe, flexible pipeline products and thermoplastic composite connections. Repurposing of existing hydrocarbon pipelines is gaining attention, but qualification is moving toward asset-specific assessment rather than general conversion assumptions. Commercially, the sector is evolving from equipment-oriented contracting toward integrated transportation services supported by long-term capacity reservations, regulated returns, take-or-pay arrangements and government-backed risk-sharing mechanisms.

Market Dynamics

Drivers

The principal market driver is the growing number of carbon capture projects moving from planning into construction and operation. The Global CCS Institute reported 77 operating projects and 47 projects under construction in 2025, expanding the

requirement for gathering lines, regional trunk infrastructure and storage-site delivery pipelines. Policy support in the United States, European carbon-management regulation, national CCUS cluster programs and decarbonization commitments in China, Canada and the Middle East are improving project bankability. Demand is reinforced by cement, lime, steel, chemicals, refining and hydrogen production, where process emissions are difficult to eliminate through electrification alone. Shared transportation infrastructure reduces duplication and can lower unit transport costs by aggregating carbon dioxide from multiple sources, improving the economic case for both large anchor emitters and smaller industrial facilities.

Restraints

Market development is restrained by high initial capital requirements, long permitting periods and uncertainty over the timing and volume of connected carbon sources. A pipeline designed ahead of demand may operate below capacity during its early years, while undersized infrastructure can require expensive expansion after additional emitters connect. Project economics also depend on synchronized development across capture, transport and storage; delays at any part of the chain can postpone revenue for the entire system. Public concerns regarding pipeline routing and safety, fragmented regulatory treatment of carbon dioxide streams, unclear cross-border liability and limited long-term transportation tariff visibility can further delay final investment decisions. Smaller or geographically dispersed emitters may remain uneconomic where a shared gathering network is unavailable.

Opportunities

The largest opportunity lies in developing cluster and shared pipeline networks around ports, industrial corridors and geological storage basins. Europe is moving toward a unified market for carbon dioxide transport and storage services, creating opportunities for cross-border offshore networks in the North Sea and adjacent industrial regions. The European Union targets at least 50 million tonnes of annual carbon dioxide injection capacity by 2030, which requires corresponding collection and transportation capacity. Further opportunities arise from repurposing technically suitable natural gas pipelines, expanding established North American networks beyond enhanced oil recovery, connecting low-carbon hydrogen and ammonia projects, and developing carbon-removal infrastructure for bioenergy and direct air capture. Suppliers can also generate recurring revenue from inspection, digital monitoring, integrity management, compressor upgrades and network-capacity expansion.

Challenges

The primary technical challenge is maintaining safe and reliable transport under variable carbon dioxide composition, pressure, temperature and flow conditions. Water, oxygen, hydrogen sulfide, nitrogen and other impurities can affect phase behaviour, corrosion, compression requirements and fracture propagation, requiring clearly defined stream specifications across all connected emitters. Shared networks must also manage intermittent supply, pressure interactions and changing injection availability without disrupting upstream capture facilities. Repurposed pipelines require detailed assessment of materials, welds, fatigue history, pressure rating, valves and emergency isolation systems. Commercial challenges include allocating capacity among users, setting transparent tariffs, defining responsibility for off-specification carbon dioxide and coordinating network expansion with uncertain capture-project schedules. A shortage of harmonized cross-border standards and experienced engineering resources may become more visible as multiple regional networks proceed simultaneously.

Industry Chain Analysis

The upstream segment comprises steel plate, line-pipe steel, corrosion-resistant alloys, polymers, reinforcing fibres, valves, fittings, seals, compressors, pumps, metering instruments, sensors, control systems and leak-detection technologies. Midstream participants manufacture seamless and welded line pipe, flexible pipe and thermoplastic composite pipe; provide engineering, procurement, construction, offshore installation, testing and certification; and own or operate gathering networks and trunk pipelines. The value created at this stage depends on material qualification, pressure and phase design, route engineering, compression efficiency, system availability and long-term integrity performance. Downstream customers include oil and gas processors, power producers, hydrogen and ammonia developers, cement and steel groups, refiners, chemical companies, fertilizer producers and carbon-removal operators. Geological storage and utilization terminals establish receiving specifications and injection schedules that directly influence pipeline design and operation. Long-term value is shifting toward operators and service providers capable of coordinating multiple sources, managing capacity and delivering reliable custody transfer under multi-user contracts.

Segment Insights

By business category, Engineering and Construction Services currently represents the largest segment because most emerging carbon dioxide networks remain in the design, construction or commissioning stage. Pipeline Products and Equipment covers steel line pipe, flexible and composite pipe, valves, compression equipment, metering, monitoring

and directly associated components. Pipeline Transportation and Operation Services is expected to become increasingly important as shared networks enter commercial operation and generate recurring capacity, connection and throughput revenue. Others primarily covers inspection, certification, technical assurance, integrity management and specialized digital monitoring services.

By Pipeline Network Structure, Point-to-Point Pipeline remains important for projects with one anchor source and one clearly defined utilization or storage destination. Cluster and Shared Pipeline Network is becoming the principal development model for industrial regions because it aggregates multiple carbon sources and spreads infrastructure costs across users. Regional Trunk Pipeline Network represents the longer-term infrastructure layer, connecting several industrial clusters, collection hubs and storage basins through high-capacity corridors. By Project Development Type, New-Build Pipeline dominates current investment because most emerging storage hubs require dedicated carbon dioxide infrastructure. Repurposed Pipeline can reduce construction requirements where existing assets meet technical and routing conditions, while Pipeline Expansion and Upgrade will grow as operating networks add emitters, laterals, compressor capacity and new storage destinations.

Downstream Market Opportunities

Oil and Gas Processing remains the most established application, supported by concentrated carbon dioxide streams and existing transportation experience. Power Generation can provide high and relatively continuous throughput, making captured-power projects potential anchor users for regional networks. Low-Carbon Hydrogen and Ammonia Production offers another scalable source because reforming and gasification processes can generate concentrated carbon dioxide streams. Cement, Lime and Iron & Steel are strategically important because a substantial portion of their emissions is process-related and difficult to eliminate through fuel substitution alone. Refining, Chemicals and Fertilizers benefit from integration within industrial clusters where several capture units can share gathering and compression infrastructure. Others includes bioethanol, bioenergy with carbon capture and storage, waste-to-energy, direct air capture and additional industrial sources, creating opportunities for negative-emission transport services and smaller network connections.

Regional Insights

North America is the largest established regional market, led by the United States' extensive carbon dioxide pipeline experience and supplemented by Canadian trunk and

storage projects. The region combines existing enhanced oil recovery infrastructure with an expanding pipeline of dedicated geological storage projects. Gulf Coast industrial concentration, suitable storage resources and policy incentives support new networks serving refining, chemicals, hydrogen, ammonia, power and direct air capture. However, permitting, route opposition and differences between federal and state regulation remain important project risks.

Europe is the most active emerging market for shared and cross-border transportation systems. North Sea storage resources are driving onshore gathering networks and offshore trunk pipelines in the Netherlands, Norway, the United Kingdom, Belgium, Denmark, France, Germany and Italy. China is developing carbon dioxide transportation around oilfields, coal-chemical facilities, power plants and industrial demonstration projects, with domestic steel-pipe and energy-equipment suppliers supporting localization. The Middle East is positioned for growth through natural gas processing, low-carbon hydrogen and ammonia and depleted-reservoir storage. Asia-Pacific development outside China is more selective, with projects concentrated in Australia, Japan, South Korea and Southeast Asian storage hubs.

Competitive Landscape Analysis

The competitive landscape is fragmented across pipeline operators, engineering contractors, equipment suppliers and line-pipe manufacturers rather than controlled by one type of company. ExxonMobil, Kinder Morgan, Enbridge, Gasunie and Fluxys compete primarily through network ownership, project development, capacity aggregation and transportation operation. Saipem and Technip Energies provide engineering and construction capabilities, while Baker Hughes, Linde, Air Products and NOV participate through compression, process integration, pipeline systems or broader carbon-management solutions. Tenaris, Vallourec, EUROPIPE, Welspun Corp, Corinth Pipeworks, Mannesmann Line Pipe, AMERICAN Steel Pipe and CNPC Bohai Equipment Manufacturing compete in qualified line pipe and associated products; Strohm addresses specialized offshore transport through thermoplastic composite pipe. DNV contributes technical assurance, qualification and integrity expertise. Future differentiation will depend on proven carbon dioxide service qualification, fracture and impurity management, offshore installation capability, network-operating experience and the ability to support projects from front-end design through long-term operation.

Report Scope

LPI (LP Information)' newest research report, the "CO2 Compression Transport

Pipelines Industry Forecast” looks at past sales and reviews total world CO2 Compression Transport Pipelines sales in 2025, providing a comprehensive analysis by region and market sector of projected CO2 Compression Transport Pipelines sales for 2026 through 2032. With CO2 Compression Transport Pipelines sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US\$ millions of the world CO2 Compression Transport Pipelines industry.

This Insight Report provides a comprehensive analysis of the global CO2 Compression Transport Pipelines landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyses the strategies of leading global companies with a focus on CO2 Compression Transport Pipelines portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms’ unique position in an accelerating global CO2 Compression Transport Pipelines market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for CO2 Compression Transport Pipelines and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global CO2 Compression Transport Pipelines.

This report presents a comprehensive overview, market shares, and growth opportunities of CO2 Compression Transport Pipelines market by product type, application, key players and key regions and countries.

Market Segmentation

Segmentation by Type:

Pipeline Products and Equipment

Engineering and Construction Services

Pipeline Transportation and Operation Services

Others

Segmentation by Pipeline Network Structure:

Point-to-Point Pipeline

Cluster and Shared Pipeline Network

Regional Trunk Pipeline Network

Segmentation by Project Development Type:

New-Build Pipeline

Repurposed Pipeline

Pipeline Expansion and Upgrade

Segmentation by Application:

Oil and Gas Processing

Power Generation

Low-Carbon Hydrogen and Ammonia Production

Cement, Lime and Iron & Steel

Refining, Chemicals and Fertilizers

Others

This report also splits the market by region:

Americas

United States

Canada

Mexico

Brazil

APAC

China

Japan

Korea

Southeast Asia

India

Australia

Europe

Germany

France

UK

Italy

Russia

Middle East & Africa

Egypt

South Africa

Israel

Turkey

GCC Countries

The below companies that are profiled have been selected based on inputs gathered from primary experts and analyzing the company's coverage, product portfolio, its market penetration.

ExxonMobil

Kinder Morgan

Saipem

Baker Hughes

Linde

Tenaris

Air Products

Gasunie

Enbridge

Technip Energies

NOV

Fluxys

Vallourec

EUROPIPE

Welspun Corp

Corinth Pipeworks

DNV

Mannesmann Line Pipe

AMERICAN Steel Pipe

Strohm

CNPC Bohai Equipment Manufacturing

Contents

1 SCOPE OF THE REPORT

- 1.1 Market Introduction
- 1.2 Years Considered
- 1.3 Research Objectives
- 1.4 Market Research Methodology
- 1.5 Research Process and Data Source
- 1.6 Economic Indicators
- 1.7 Currency Considered
- 1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

2.1 World Market Overview

- 2.1.1 Global CO₂ Compression Transport Pipelines Market Size (2021-2032)
- 2.1.2 CO₂ Compression Transport Pipelines Market Size CAGR by Region (2021 VS 2025 VS 2032)
- 2.1.3 World Current & Future Analysis for CO₂ Compression Transport Pipelines by Country/Region (2021, 2025 & 2032)

2.2 CO₂ Compression Transport Pipelines Segment by Type

- 2.2.1 Pipeline Products and Equipment
- 2.2.2 Engineering and Construction Services
- 2.2.3 Pipeline Transportation and Operation Services
- 2.2.4 Others
- 2.2.5 CO₂ Compression Transport Pipelines Market Size by Type
 - 2.2.5.1 CO₂ Compression Transport Pipelines Market Size CAGR by Type (2021 VS 2025 VS 2032)
 - 2.2.5.2 Global CO₂ Compression Transport Pipelines Market Size Market Share by Type (2021-2026)

2.3 CO₂ Compression Transport Pipelines Segment by Pipeline Network Structure

- 2.3.1 Point-to-Point Pipeline
- 2.3.2 Cluster and Shared Pipeline Network
- 2.3.3 Regional Trunk Pipeline Network
- 2.3.4 CO₂ Compression Transport Pipelines Market Size by Pipeline Network Structure
 - 2.3.4.1 CO₂ Compression Transport Pipelines Market Size CAGR by Pipeline Network Structure (2021 VS 2025 VS 2032)

2.3.4.2 Global CO2 Compression Transport Pipelines Market Size Market Share by Pipeline Network Structure (2021-2026)

2.4 CO2 Compression Transport Pipelines Segment by Project Development Type

2.4.1 New-Build Pipeline

2.4.2 Repurposed Pipeline

2.4.3 Pipeline Expansion and Upgrade

2.4.4 CO2 Compression Transport Pipelines Market Size by Project Development Type

2.4.4.1 CO2 Compression Transport Pipelines Market Size CAGR by Project Development Type (2021 VS 2025 VS 2032)

2.4.4.2 Global CO2 Compression Transport Pipelines Market Size Market Share by Project Development Type (2021-2026)

2.5 CO2 Compression Transport Pipelines Segment by Application

2.5.1 Oil and Gas Processing

2.5.2 Power Generation

2.5.3 Low-Carbon Hydrogen and Ammonia Production

2.5.4 Cement, Lime and Iron & Steel

2.5.5 Refining, Chemicals and Fertilizers

2.5.6 Others

2.5.7 CO2 Compression Transport Pipelines Market Size by Application

2.5.7.1 CO2 Compression Transport Pipelines Market Size CAGR by Application (2021 VS 2025 VS 2032)

2.5.7.2 Global CO2 Compression Transport Pipelines Market Size Market Share by Application (2021-2026)

3 CO2 COMPRESSION TRANSPORT PIPELINES MARKET SIZE BY PLAYER

3.1 CO2 Compression Transport Pipelines Market Size Market Share by Player

3.1.1 Global CO2 Compression Transport Pipelines Revenue by Player (2021-2026)

3.1.2 Global CO2 Compression Transport Pipelines Revenue Market Share by Player (2021-2026)

3.2 Global CO2 Compression Transport Pipelines Key Players Head office and Products Offered

3.3 Market Concentration Rate Analysis

3.3.1 Competition Landscape Analysis

3.3.2 Concentration Ratio (CR3, CR5 and CR10) & (2024-2026)

3.4 New Products and Potential Entrants

3.5 Mergers & Acquisitions, Expansion

4 CO2 COMPRESSION TRANSPORT PIPELINES BY REGION

- 4.1 CO2 Compression Transport Pipelines Market Size by Region (2021-2026)
- 4.2 Global CO2 Compression Transport Pipelines Annual Revenue by Country/Region (2021-2026)
- 4.3 Americas CO2 Compression Transport Pipelines Market Size Growth (2021-2026)
- 4.4 APAC CO2 Compression Transport Pipelines Market Size Growth (2021-2026)
- 4.5 Europe CO2 Compression Transport Pipelines Market Size Growth (2021-2026)
- 4.6 Middle East & Africa CO2 Compression Transport Pipelines Market Size Growth (2021-2026)

5 AMERICAS

- 5.1 Americas CO2 Compression Transport Pipelines Market Size by Country (2021-2026)
- 5.2 Americas CO2 Compression Transport Pipelines Market Size by Type (2021-2026)
- 5.3 Americas CO2 Compression Transport Pipelines Market Size by Application (2021-2026)
- 5.4 United States
- 5.5 Canada
- 5.6 Mexico
- 5.7 Brazil

6 APAC

- 6.1 APAC CO2 Compression Transport Pipelines Market Size by Region (2021-2026)
- 6.2 APAC CO2 Compression Transport Pipelines Market Size by Type (2021-2026)
- 6.3 APAC CO2 Compression Transport Pipelines Market Size by Application (2021-2026)
- 6.4 China
- 6.5 Japan
- 6.6 South Korea
- 6.7 Southeast Asia
- 6.8 India
- 6.9 Australia

7 EUROPE

- 7.1 Europe CO2 Compression Transport Pipelines Market Size by Country (2021-2026)

7.2 Europe CO2 Compression Transport Pipelines Market Size by Type (2021-2026)

7.3 Europe CO2 Compression Transport Pipelines Market Size by Application (2021-2026)

7.4 Germany

7.5 France

7.6 UK

7.7 Italy

7.8 Russia

8 MIDDLE EAST & AFRICA

8.1 Middle East & Africa CO2 Compression Transport Pipelines by Region (2021-2026)

8.2 Middle East & Africa CO2 Compression Transport Pipelines Market Size by Type (2021-2026)

8.3 Middle East & Africa CO2 Compression Transport Pipelines Market Size by Application (2021-2026)

8.4 Egypt

8.5 South Africa

8.6 Israel

8.7 Turkey

8.8 GCC Countries

9 MARKET DRIVERS, CHALLENGES AND TRENDS

9.1 Market Drivers & Growth Opportunities

9.2 Market Challenges & Risks

9.3 Industry Trends

10 GLOBAL CO2 COMPRESSION TRANSPORT PIPELINES MARKET FORECAST

10.1 Global CO2 Compression Transport Pipelines Forecast by Region (2027-2032)

10.1.1 Global CO2 Compression Transport Pipelines Forecast by Region (2027-2032)

10.1.2 Americas CO2 Compression Transport Pipelines Forecast

10.1.3 APAC CO2 Compression Transport Pipelines Forecast

10.1.4 Europe CO2 Compression Transport Pipelines Forecast

10.1.5 Middle East & Africa CO2 Compression Transport Pipelines Forecast

10.2 Americas CO2 Compression Transport Pipelines Forecast by Country (2027-2032)

10.2.1 United States Market CO2 Compression Transport Pipelines Forecast

10.2.2 Canada Market CO2 Compression Transport Pipelines Forecast

- 10.2.3 Mexico Market CO2 Compression Transport Pipelines Forecast
- 10.2.4 Brazil Market CO2 Compression Transport Pipelines Forecast
- 10.3 APAC CO2 Compression Transport Pipelines Forecast by Region (2027-2032)
 - 10.3.1 China CO2 Compression Transport Pipelines Market Forecast
 - 10.3.2 Japan Market CO2 Compression Transport Pipelines Forecast
 - 10.3.3 Korea Market CO2 Compression Transport Pipelines Forecast
 - 10.3.4 Southeast Asia Market CO2 Compression Transport Pipelines Forecast
 - 10.3.5 India Market CO2 Compression Transport Pipelines Forecast
 - 10.3.6 Australia Market CO2 Compression Transport Pipelines Forecast
- 10.4 Europe CO2 Compression Transport Pipelines Forecast by Country (2027-2032)
 - 10.4.1 Germany Market CO2 Compression Transport Pipelines Forecast
 - 10.4.2 France Market CO2 Compression Transport Pipelines Forecast
 - 10.4.3 UK Market CO2 Compression Transport Pipelines Forecast
 - 10.4.4 Italy Market CO2 Compression Transport Pipelines Forecast
 - 10.4.5 Russia Market CO2 Compression Transport Pipelines Forecast
- 10.5 Middle East & Africa CO2 Compression Transport Pipelines Forecast by Region (2027-2032)
 - 10.5.1 Egypt Market CO2 Compression Transport Pipelines Forecast
 - 10.5.2 South Africa Market CO2 Compression Transport Pipelines Forecast
 - 10.5.3 Israel Market CO2 Compression Transport Pipelines Forecast
 - 10.5.4 Turkey Market CO2 Compression Transport Pipelines Forecast
- 10.6 Global CO2 Compression Transport Pipelines Forecast by Type (2027-2032)
- 10.7 Global CO2 Compression Transport Pipelines Forecast by Application (2027-2032)
 - 10.7.1 GCC Countries Market CO2 Compression Transport Pipelines Forecast

11 KEY PLAYERS ANALYSIS

- 11.1 ExxonMobil
 - 11.1.1 ExxonMobil Company Information
 - 11.1.2 ExxonMobil CO2 Compression Transport Pipelines Product Offered
 - 11.1.3 ExxonMobil CO2 Compression Transport Pipelines Revenue, Gross Margin and Market Share (2021-2026)
 - 11.1.4 ExxonMobil Main Business Overview
 - 11.1.5 ExxonMobil Latest Developments
- 11.2 Kinder Morgan
 - 11.2.1 Kinder Morgan Company Information
 - 11.2.2 Kinder Morgan CO2 Compression Transport Pipelines Product Offered
 - 11.2.3 Kinder Morgan CO2 Compression Transport Pipelines Revenue, Gross Margin and Market Share (2021-2026)

- 11.2.4 Kinder Morgan Main Business Overview
- 11.2.5 Kinder Morgan Latest Developments
- 11.3 Saipem
 - 11.3.1 Saipem Company Information
 - 11.3.2 Saipem CO2 Compression Transport Pipelines Product Offered
 - 11.3.3 Saipem CO2 Compression Transport Pipelines Revenue, Gross Margin and Market Share (2021-2026)
 - 11.3.4 Saipem Main Business Overview
 - 11.3.5 Saipem Latest Developments
- 11.4 Baker Hughes
 - 11.4.1 Baker Hughes Company Information
 - 11.4.2 Baker Hughes CO2 Compression Transport Pipelines Product Offered
 - 11.4.3 Baker Hughes CO2 Compression Transport Pipelines Revenue, Gross Margin and Market Share (2021-2026)
 - 11.4.4 Baker Hughes Main Business Overview
 - 11.4.5 Baker Hughes Latest Developments
- 11.5 Linde
 - 11.5.1 Linde Company Information
 - 11.5.2 Linde CO2 Compression Transport Pipelines Product Offered
 - 11.5.3 Linde CO2 Compression Transport Pipelines Revenue, Gross Margin and Market Share (2021-2026)
 - 11.5.4 Linde Main Business Overview
 - 11.5.5 Linde Latest Developments
- 11.6 Tenaris
 - 11.6.1 Tenaris Company Information
 - 11.6.2 Tenaris CO2 Compression Transport Pipelines Product Offered
 - 11.6.3 Tenaris CO2 Compression Transport Pipelines Revenue, Gross Margin and Market Share (2021-2026)
 - 11.6.4 Tenaris Main Business Overview
 - 11.6.5 Tenaris Latest Developments
- 11.7 Air Products
 - 11.7.1 Air Products Company Information
 - 11.7.2 Air Products CO2 Compression Transport Pipelines Product Offered
 - 11.7.3 Air Products CO2 Compression Transport Pipelines Revenue, Gross Margin and Market Share (2021-2026)
 - 11.7.4 Air Products Main Business Overview
 - 11.7.5 Air Products Latest Developments
- 11.8 Gasunie
 - 11.8.1 Gasunie Company Information

- 11.8.2 Gasunie CO2 Compression Transport Pipelines Product Offered
- 11.8.3 Gasunie CO2 Compression Transport Pipelines Revenue, Gross Margin and Market Share (2021-2026)
- 11.8.4 Gasunie Main Business Overview
- 11.8.5 Gasunie Latest Developments
- 11.9 Enbridge
 - 11.9.1 Enbridge Company Information
 - 11.9.2 Enbridge CO2 Compression Transport Pipelines Product Offered
 - 11.9.3 Enbridge CO2 Compression Transport Pipelines Revenue, Gross Margin and Market Share (2021-2026)
 - 11.9.4 Enbridge Main Business Overview
 - 11.9.5 Enbridge Latest Developments
- 11.10 Technip Energies
 - 11.10.1 Technip Energies Company Information
 - 11.10.2 Technip Energies CO2 Compression Transport Pipelines Product Offered
 - 11.10.3 Technip Energies CO2 Compression Transport Pipelines Revenue, Gross Margin and Market Share (2021-2026)
 - 11.10.4 Technip Energies Main Business Overview
 - 11.10.5 Technip Energies Latest Developments
- 11.11 NOV
 - 11.11.1 NOV Company Information
 - 11.11.2 NOV CO2 Compression Transport Pipelines Product Offered
 - 11.11.3 NOV CO2 Compression Transport Pipelines Revenue, Gross Margin and Market Share (2021-2026)
 - 11.11.4 NOV Main Business Overview
 - 11.11.5 NOV Latest Developments
- 11.12 Fluxys
 - 11.12.1 Fluxys Company Information
 - 11.12.2 Fluxys CO2 Compression Transport Pipelines Product Offered
 - 11.12.3 Fluxys CO2 Compression Transport Pipelines Revenue, Gross Margin and Market Share (2021-2026)
 - 11.12.4 Fluxys Main Business Overview
 - 11.12.5 Fluxys Latest Developments
- 11.13 Vallourec
 - 11.13.1 Vallourec Company Information
 - 11.13.2 Vallourec CO2 Compression Transport Pipelines Product Offered
 - 11.13.3 Vallourec CO2 Compression Transport Pipelines Revenue, Gross Margin and Market Share (2021-2026)
 - 11.13.4 Vallourec Main Business Overview

- 11.13.5 Vallourec Latest Developments
- 11.14 EUROPIPE
