According to our research, the global market for medical devices is estimated at US\$ 603 billion in the year 2023, and will be growing at a CAGR of 5% during next six years. The global healthcare spending contributes to occupy 10% of the global GDP and is continuously rising in recent years due to the increasing health needs of the aging population, the growing prevalence of chronic and infectious diseases and the expansion of emerging markets. The medical devices market plays a significant role in the healthcare industry. The market is driven by several factors, including the increasing demand for advanced healthcare services globally, advancements in medical technology, growing geriatric population, rising healthcare expenditure, and increasing awareness about early disease diagnosis and treatment. The market for coagulation analyzers is expected to witness significant growth due to surging demand for coagulation analyzers across the world owing to growing awareness in healthcare systems. The introduction of new coagulation analyzer tests and rapid technological advancements have improved the efficiency and quality of hemostasis laboratories. That's because these advanced coagulators offer high throughput, reliability, and adaptability, along with precision, accuracy, and easy-to-use software with built-in graphics and calibration curves. Growing awareness of the risks of cardiovascular disease, obesity and high blood pressure has forced people to gather in hospitals and healthcare facilities for routine blood tests. This is expected to aid in the expansion of the coagulation analyzer market and motivate manufacturers to develop better and faster testing methods. Nonetheless, risk of side effects associated with blood testing, coupled with stringent regulations imposed by the government on the approval of coagulation testing devices, are estimated to hamper the demand for hemostasis analyzers. Conversely, sales of coagulation analyzers are likely to increase as manufacturers increasingly rely on expanding their product portfolios to e-commerce platforms.
