Coal mine rubber sheathed flexible cable is a specially designed power and control cable used in underground mining environments, particularly in coal mines, where safety, durability, and flexibility are critical. These cables are constructed with high-grade rubber insulation and sheathing, offering excellent resistance to abrasion, moisture, oil, flame, and mechanical stress. Their flexible structure allows for easy routing around mining equipment and tunnels, even under repeated movement or harsh conditions.

Engineered to meet strict mining safety standards (such as MT818, GB, or IEC standards), these cables often feature copper conductors, reinforced layers, shielding, and sometimes monitoring cores for fault detection. They are used to supply power to equipment like drilling machines, coal cutters, conveyors, and lighting systems.
