The global Coal-Spec Toilets market size is predicted to grow from US\$ 261 million in 2025 to US\$ 371 million in 2032; it is expected to grow at a CAGR of 5.2% from 2026 to 2032.

Coal-Spec Toilets are portable or fixed sanitary facilities specifically designed for underground coal mines or coal mining work areas. They are characterized by explosion-proof, fire-proof, corrosion-resistant, and highly airtight features, adapting to harsh environments such as high humidity, high dust, and low light. Their structure is typically made of corrosion-resistant steel plates or fiberglass, and the interior is equipped with a vacuum suction system, waterless flushing device, deodorization system, lighting equipment, and ventilation system. In high-risk environments such as coal mines, ordinary toilets are ill-suited to the conditions of high temperature, high humidity, high dust, and poor ventilation. Coal-Spec Toilets, through their explosion-proof design and high airtightness, effectively ensure the safety and hygiene of miners when using the toilet, improving the quality of the working environment. The average price of this product is approximately US\$2,000 per set, with global sales of approximately 133,000 sets.

United States market for Coal-Spec Toilets is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
