The report requires updating with new data and is sent in 48 hours after order is placed.

The global Coating (Painting) Additives market size is predicted to grow from US\$ million in 2025 to US\$ million in 2031; it is expected to grow at a CAGR of %from 2025 to 2031.

Dispersant or Dispersing Agent is either a non-surface active polymer or a surface-active substance added to a suspension, usually a colloid, to improve the separation of particles and to prevent settling or clumping. The role of the dispersant is to make the dispersion process easier and more stable. Dispersants consist normally of one or more surfactants, but may also be gases.

Latex paint dispersants are divided into four categories: phosphate dispersants, polyacid homopolymer dispersants, polyacid copolymer dispersants and others.

Global Coating (Painting) Additives key players include BYK, Evonik Industries, Shin-Etsu Silicone, etc. Global top three manufacturers hold a share about 50%.

In terms of product, Dispersing Agent is the largest segment, with a share about 40%. And in terms of application, the largest application is Architectural Coating, followed by Automotive Coating.
