Cobalt titanate green is an inorganic pigment composed primarily of cobalt and titanium oxides, known for its excellent thermal stability, chemical resistance, and vibrant green-blue hue. It belongs to the class of complex inorganic color pigments (CICPs), specifically a spinel-type structure, which provides strong durability and weather resistance, making it ideal for applications in ceramics, glass enamels, high-temperature coatings, plastics, and industrial paints. Unlike organic pigments, cobalt titanate green maintains its color integrity under harsh processing conditions and prolonged UV exposure, making it especially suitable for automotive, architectural, and outdoor environments where colorfastness and longevity are critical.
