The Cockpit Voice Recorder (CVR), is one of the plane's 'black boxes' (flight recorders). The four audio tracks on the instrument record the conversations between the pilot and the air traffic controller, the conversations between the pilot and the co-pilot in the cockpit, the broadcasts from the pilot and the flight attendant to the passengers, and the various sounds in the cockpit, including the sounds of various alarms. So in an accident, the cockpit voice recorder is as important as the flight data recorder, and sometimes even the voice recorder can be the key to an investigation.
