Abstracts

The global Code Repository Software market size is predicted to grow from US\$ 6114 million in 2025 to US\$ 12304 million in 2032; it is expected to grow at a CAGR of 10.6% from 2026 to 2032.

Code Repository Software is a software platform that uses software source code, configuration files, and their version history as core data objects. It provides developers, R&D teams, and enterprises with capabilities such as code repository creation and hosting, version tracking, branching and merging, pull or merge requests, code review, access permissions, authentication, audit logs, repository search, change tracking, backup and recovery, and collaborative development. Key performance indicators (KPIs) include supported version control protocols, repository and concurrent user scale, branching and merging performance, handling of large files and very large monolithic repositories, fine-grained permissions, single sign-on, auditing and compliance, data residency, high availability and disaster recovery, API and automation capabilities, and integration with IDEs, project management, CI/CD, code security, and artifact management tools.

Key Findings

Cloud-based and on-premises deployment serve different governance integration and data-residency requirements

Basic code hosting and full-process DevOps platforms form the two core functional categories

Environments exceeding 1,000 repositories require stronger governance automation

and storage architecture

Code Repository Software supports secure development collaboration and software supply chain control

Internet finance defense and healthcare users prioritize availability auditability and access control

Market Trends

Code Repository Software is evolving from a version-control and code-hosting system into a central DevSecOps operating platform. Repositories increasingly connect planning, coding, peer review, automated testing, security scanning, package management, release approval, deployment, and production feedback within a traceable workflow. AI-assisted code review is becoming a notable product direction, helping developers identify issues, summarize changes, propose fixes, and apply repository-specific coding instructions, while human approval remains important for architecture, security, and production decisions. Security capabilities are moving closer to the repository through secret detection, dependency analysis, code scanning, protected branches, signed changes, policy enforcement, and centralized vulnerability dashboards. Enterprises are also seeking stronger support for software supply chain evidence, reusable pipeline components, internal development portals, and standardized controls across large repository estates. Cloud services emphasize rapid provisioning, managed upgrades, elastic automation, and distributed collaboration, while self-hosted and hybrid architectures continue to serve customers requiring local data control, restricted networks, specialized build infrastructure, or regional data residency. For large binary assets, game development, engineering files, and globally distributed teams, scalable storage and alternative centralized or hybrid version-control architectures remain relevant alongside Git-based platforms.

Market Dynamics

Drivers

The principal market driver is the growing dependence of enterprises on software and the need to coordinate frequent code changes across distributed development teams. Code Repository Software creates a controlled system of record for source code and configuration, enabling organizations to identify who changed a file, review the reason for the change, restore earlier versions, and connect approved code with testing and

deployment processes. Internet companies require scalable collaboration and rapid release cycles, while financial, defense, and healthcare organizations place additional emphasis on confidentiality, change accountability, segregation of duties, audit trails, and controlled production releases. Secure software development requirements also strengthen demand for repository access restrictions, version history, code review, commit integrity, vulnerability scanning, and integration of security controls into CI/CD pipelines. The expansion of cloud-native applications, infrastructure as code, microservices, mobile software, data engineering, and AI applications increases the number of repositories and dependencies that organizations must govern. Full-process DevOps platforms gain further support as customers seek to reduce tool fragmentation and manage code, pipelines, security findings, packages, releases, and operational approvals through a more consistent platform.

Restraints

Adoption and platform replacement can be constrained by migration complexity, existing development habits, integration dependencies, storage requirements, and the operational risk of moving critical source-code histories. Repository migrations must preserve branches, tags, authorship, permissions, large files, issue references, automation credentials, and links with development tools. Organizations operating legacy, mainframe, engineering, or game-development environments may also depend on centralized workflows or binary-asset handling that cannot be transferred directly to a standard Git configuration. Cloud-based products may raise concerns regarding source-code sovereignty, external service availability, subscription costs, data transfer, and dependency on a vendor's identity, pipeline, and extension ecosystem. On-premises products provide greater infrastructure control but require server capacity, storage architecture, upgrades, backups, high availability, security monitoring, and experienced administrators. Self-hosted build runners introduce additional risk because pipeline code may execute inside sensitive networks or privileged environments. Smaller organizations with >1,000 repositories may find full-process enterprise platforms administratively complex, while open-source and bundled tools reduce willingness to pay for basic hosting functions. Large environments exceeding 1,000 repositories face further challenges involving inactive repositories, duplicated components, inconsistent ownership, storage growth, fragmented permissions, and policy enforcement at scale.

Opportunities

Important opportunities are emerging in AI-assisted development, automated repository governance, software supply chain security, and integrated cloud-to-on-premises workflows. AI functions can support pull-request summaries, code review, remediation

suggestions, dependency upgrades, repository maintenance, documentation, and developer search, creating additional value when recommendations are aligned with organizational standards and repository context. Environments with more than 1,000 repositories require automated ownership discovery, repository classification, archival policies, access reviews, security configuration templates, dependency mapping, and portfolio-level risk dashboards. Full-process DevOps products can expand by unifying source control with CI/CD, secret detection, code scanning, artifact and container registries, deployment permissions, compliance evidence, and release analytics. On-premises, private-cloud, and hybrid solutions retain opportunities in defense, finance, healthcare, government-related systems, and other environments requiring restricted connectivity or local data administration. Large-file and high-performance version control also remains relevant to gaming, digital content, engineering, simulation, and other asset-intensive development. Providers can generate additional recurring value through managed hosting, storage and compute consumption, enterprise support, migration services, disaster recovery, security modules, AI functions, developer analytics, and professional DevOps transformation services.

Challenges

The central industry challenge is maintaining repository integrity, availability, and secure automation as development estates become larger and more interconnected. A compromised developer account, exposed token, malicious dependency, unauthorized branch change, or manipulated pipeline can affect both source code and downstream software releases. Repository platforms must therefore protect credentials, enforce least-privilege access, separate development and production permissions, preserve audit histories, and control which workflows or runners may access sensitive environments. Organizations also need to identify abandoned repositories, unmaintained dependencies, duplicated code, embedded secrets, and inconsistent security settings across large portfolios. AI-assisted review introduces further challenges because recommendations may be incomplete, incorrect, or insufficiently aware of architectural and business context, requiring testing and accountable human approval. Platform operators must maintain compatibility with development tools, operating systems, identity providers, build environments, package formats, security scanners, and third-party integrations. High availability and disaster recovery are critical because repository outages can interrupt development, testing, deployment, and incident remediation across the organization. Long-term platform competitiveness will depend on combining usability, scalability, security, open integration, data portability, and transparent governance without creating excessive process friction for developers.

Value Chain Analysis

The upstream value chain for Code Repository Software consists of version-control protocols and engines, cloud and server infrastructure, databases, file and object storage, networking, identity systems, cryptographic services, operating systems, development environments, build runners, package formats, and software-security technologies. Distributed and centralized version-control architectures provide the underlying mechanisms for tracking revisions, branches, merges, and contributor activity. Storage systems retain repository objects, large files, metadata, logs, packages, artifacts, and backups, while identity and access services establish user, group, role, and machine permissions. Cryptographic signing and hashing support integrity and provenance controls. Development tools, APIs, webhooks, runners, security scanners, and package ecosystems connect the repository with the wider software lifecycle. Upstream performance, reliability, and security directly influence clone and fetch speed, storage efficiency, pipeline execution, global availability, and the protection of proprietary code.

The midstream layer develops repository servers, cloud services, web interfaces, branching and merge workflows, review systems, issue management, CI/CD engines, package and container registries, security controls, deployment governance, analytics, and administrative tools. Products reach customers through cloud subscriptions, on-premises licenses, managed hosting, open-source distributions, enterprise support, storage and compute consumption, and implementation services. Downstream users create value by improving developer collaboration, accelerating delivery, protecting intellectual property, automating quality controls, and maintaining evidence of software changes. Principal costs include software engineering, infrastructure, data storage, network traffic, security research, compliance, technical support, ecosystem development, and customer acquisition. Basic code hosting is often priced through users, storage, or enterprise licenses, while full-process DevOps platforms can generate additional revenue from automation capacity, security modules, artifact management, AI services, analytics, and professional support. Competitive value increasingly concentrates in platform integration, repository-scale governance, reliability, developer experience, security depth, and the ability to support both modern and legacy development environments.

Segment Insights

By deployment mode, cloud-based Code Repository Software offers rapid provisioning, managed upgrades, geographically distributed access, centralized collaboration, and

easier connection with cloud-based build and deployment services. It is suitable for internet companies, distributed development teams, and organizations seeking to reduce internal platform administration. Customers must nevertheless evaluate data residency, external connectivity, service availability, account governance, storage costs, and integration with private development environments. On-premises deployment provides direct control over repository data, identity systems, network access, backups, upgrade schedules, and build infrastructure. It remains relevant to defense, financial, healthcare, and other security-sensitive environments, although implementation requires infrastructure investment and ongoing administration. Hybrid models can combine cloud collaboration with self-hosted runners, private artifact systems, or locally managed repositories.

By repository count, the >1,000 category generally includes smaller enterprises, individual business units, growing software companies, and organizations with relatively concentrated development portfolios. These customers typically emphasize ease of administration, predictable licensing, straightforward integrations, and rapid adoption. Environments with >1,000 repositories require stronger controls for ownership, naming, templates, retention, access, security settings, storage allocation, and inactive-project management. By core function, basic code hosting products focus on repository creation, version history, branching, merging, permissions, collaboration, and backup. Full-process DevOps products extend the repository into planning, automated building and testing, security scanning, package management, deployment approvals, release management, and operational feedback. The full-process model can reduce tool fragmentation, while basic hosting remains attractive where organizations prefer modular tools, established internal pipelines, or specialized version-control workflows.

Downstream Market Opportunities

Internet companies use Code Repository Software to coordinate large developer populations, manage microservices, automate frequent releases, and connect code changes with cloud infrastructure and production operations. Financial institutions require controlled access, traceable approvals, secure pipelines, segregation of duties, and evidence supporting software-risk governance. Defense users place greater emphasis on isolated networks, local deployment, source-code confidentiality, software provenance, restricted build environments, and long-term support. Healthcare organizations need reliable change management for clinical, administrative, research, and connected-device software while protecting sensitive data and maintaining validated release processes. Other opportunities arise in telecommunications, manufacturing, gaming, transportation, energy, government, education, and

professional software services. Asset-intensive industries can create demand for platforms capable of managing source code together with large binaries and digital content. Suppliers that support cloud and local architectures, security controls, standardized pipelines, migration, and developer productivity can expand from repository hosting into broader development infrastructure. Software supply chain governance and AI-assisted engineering also create opportunities for platforms that can apply consistent policies and intelligence across the customer's complete repository portfolio.

Regional Insights

North America represents a major development and adoption center for Code Repository Software, supported by a broad concentration of cloud, enterprise software, DevOps, security, and development-platform providers. Regional customers commonly emphasize cloud integration, developer productivity, AI-assisted workflows, application security, and enterprise-scale governance. Cloud services coexist with self-hosted products because financial institutions, defense organizations, healthcare enterprises, and large technology companies may require private infrastructure or controlled automation environments. Europe has similar demand for integrated software delivery and security, with additional emphasis on data residency, regional cloud architecture, privacy, access governance, and source-code sovereignty. These requirements create opportunities for cloud products with regional data controls and for self-managed or hybrid deployment.

Asia-Pacific has a diverse supplier and customer base shaped by large internet platforms, expanding cloud infrastructure, manufacturing digitalization, financial technology, gaming, telecommunications, and government-related software programs. China has developed domestic cloud and Code Repository Software providers capable of supporting local-language development, private deployment, domestic infrastructure, and enterprise integration. Japan and South Korea generate demand for high-reliability enterprise development, project collaboration, gaming, and localized cloud services. Other regional markets can adopt cloud-based products as software teams expand, while regulated or infrastructure-sensitive customers may prefer private-cloud and on-premises architectures. Local technical support, language, billing, network performance, domestic ecosystem compatibility, and regional governance requirements strongly influence platform selection. Across the region, opportunities are increasing for repository migration, DevOps integration, secure development, portfolio governance, and collaboration across distributed engineering teams.

Competitive Landscape Analysis

The Code Repository Software market combines global cloud platforms, integrated DevOps providers, enterprise version-control vendors, legacy software lifecycle specialists, and regional development platforms. Microsoft Corporation, GitLab Inc., and Atlassian Corporation participate through broad code collaboration, review, automation, security, and DevOps ecosystems. Perforce Software, Inc. provides scalable centralized and hybrid version control with strengths in large files and digital assets, while OpenText Corporation, Broadcom Inc., HCL Technologies Limited, BMC Software, Inc., International Business Machines Corporation, and Rocket Software, Inc. address enterprise, mainframe, legacy modernization, application lifecycle, or controlled development environments. Amazon Web Services, Inc., Alibaba Cloud Computing Co., Ltd., Huawei Cloud Computing Technologies Co., Ltd., Tencent Holdings Limited, Google LLC, Oracle Corporation, NAVER Cloud Corp., Yandex LLC, and SberTech JSC participate through cloud infrastructure, managed development services, regional ecosystems, and enterprise integration. Beijing Aosi Yangong Intelligent Technology Co., Ltd. provides localized repository and developer collaboration capabilities in China. Digital.ai Software, Inc. and Harness Inc. emphasize broader software delivery and DevOps orchestration, while Unity Software Inc. connects development workflows with asset-intensive interactive-content production. CommitGo, Inc., SourceGear LLC, Nulab Inc., and other specialized participants compete through focused version control, collaboration, development management, or regional services. Market differentiation centers on cloud and on-premises availability, repository scalability, access governance, code review, CI/CD integration, security, large-file support, AI capabilities, ecosystem breadth, migration services, and enterprise support. Integrated platforms benefit from wider lifecycle coverage, while specialized providers compete through performance, deployment control, legacy compatibility, localization, and focused developer workflows.

Report Scope

LPI (LP Information)' newest research report, the "Code Repository Software Industry Forecast" looks at past sales and reviews total world Code Repository Software sales in 2025, providing a comprehensive analysis by region and market sector of projected Code Repository Software sales for 2026 through 2032. With Code Repository Software sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US\$ millions of the world Code Repository Software industry.

This Insight Report provides a comprehensive analysis of the global Code Repository Software landscape and highlights key trends related to product segmentation,

company formation, revenue, and market share, latest development, and M&A activity. This report also analyses the strategies of leading global companies with a focus on Code Repository Software portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global Code Repository Software market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Code Repository Software and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Code Repository Software.

This report presents a comprehensive overview, market shares, and growth opportunities of Code Repository Software market by product type, application, key players and key regions and countries.

1 SCOPE OF THE REPORT

- 1.1 Market Introduction
- 1.2 Years Considered
- 1.3 Research Objectives
- 1.4 Market Research Methodology
- 1.5 Research Process and Data Source
- 1.6 Economic Indicators
- 1.7 Currency Considered
- 1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

- 2.1 World Market Overview
 - 2.1.1 Global Code Repository Software Market Size (2021-2032)
 - 2.1.2 Code Repository Software Market Size CAGR by Region (2021 VS 2025 VS 2032)
 - 2.1.3 World Current & Future Analysis for Code Repository Software by Country/Region (2021, 2025 & 2032)
- 2.2 Code Repository Software Segment by Type
 - 2.2.1 Local Deployment
 - 2.2.2 Cloud-based
 - 2.2.3 Code Repository Software Market Size by Type
 - 2.2.3.1 Code Repository Software Market Size CAGR by Type (2021 VS 2025 VS 2032)
 - 2.2.3.2 Global Code Repository Software Market Size Market Share by Type (2021-2026)
- 2.3 Code Repository Software Segment by Number of Code Repositories
 - 2.3.1 ?1000
 - 2.3.2 ?1000
 - 2.3.3 Code Repository Software Market Size by Number of Code Repositories
 - 2.3.3.1 Code Repository Software Market Size CAGR by Number of Code Repositories (2021 VS 2025 VS 2032)
 - 2.3.3.2 Global Code Repository Software Market Size Market Share by Number of Code Repositories (2021-2026)
- 2.4 Code Repository Software Segment by Core Functionality
 - 2.4.1 Basic Code Hosting

2.4.2 Full-Process DevOps

2.4.3 Code Repository Software Market Size by Core Functionality

2.4.3.1 Code Repository Software Market Size CAGR by Core Functionality (2021 VS 2025 VS 2032)

2.4.3.2 Global Code Repository Software Market Size Market Share by Core Functionality (2021-2026)

2.5 Code Repository Software Segment by Application

2.5.1 Internet

2.5.2 Finance Industry

2.5.3 Military Industry

2.5.4 Healthcare

2.5.5 Other

2.5.6 Code Repository Software Market Size by Application

2.5.6.1 Code Repository Software Market Size CAGR by Application (2021 VS 2025 VS 2032)

2.5.6.2 Global Code Repository Software Market Size Market Share by Application (2021-2026)

3 CODE REPOSITORY SOFTWARE MARKET SIZE BY PLAYER

3.1 Code Repository Software Market Size Market Share by Player

3.1.1 Global Code Repository Software Revenue by Player (2021-2026)

3.1.2 Global Code Repository Software Revenue Market Share by Player (2021-2026)

3.2 Global Code Repository Software Key Players Head office and Products Offered

3.3 Market Concentration Rate Analysis

3.3.1 Competition Landscape Analysis

3.3.2 Concentration Ratio (CR3, CR5 and CR10) & (2024-2026)

3.4 New Products and Potential Entrants

3.5 Mergers & Acquisitions, Expansion

4 CODE REPOSITORY SOFTWARE BY REGION

4.1 Code Repository Software Market Size by Region (2021-2026)

4.2 Global Code Repository Software Annual Revenue by Country/Region (2021-2026)

4.3 Americas Code Repository Software Market Size Growth (2021-2026)

4.4 APAC Code Repository Software Market Size Growth (2021-2026)

4.5 Europe Code Repository Software Market Size Growth (2021-2026)

4.6 Middle East & Africa Code Repository Software Market Size Growth (2021-2026)

5 AMERICAS

- 5.1 Americas Code Repository Software Market Size by Country (2021-2026)
- 5.2 Americas Code Repository Software Market Size by Type (2021-2026)
- 5.3 Americas Code Repository Software Market Size by Application (2021-2026)
- 5.4 United States
- 5.5 Canada
- 5.6 Mexico
- 5.7 Brazil

6 APAC

- 6.1 APAC Code Repository Software Market Size by Region (2021-2026)
- 6.2 APAC Code Repository Software Market Size by Type (2021-2026)
- 6.3 APAC Code Repository Software Market Size by Application (2021-2026)
- 6.4 China
- 6.5 Japan
- 6.6 South Korea
- 6.7 Southeast Asia
- 6.8 India
- 6.9 Australia

7 EUROPE

- 7.1 Europe Code Repository Software Market Size by Country (2021-2026)
- 7.2 Europe Code Repository Software Market Size by Type (2021-2026)
- 7.3 Europe Code Repository Software Market Size by Application (2021-2026)
- 7.4 Germany
- 7.5 France
- 7.6 UK
- 7.7 Italy
- 7.8 Russia

8 MIDDLE EAST & AFRICA

- 8.1 Middle East & Africa Code Repository Software by Region (2021-2026)
- 8.2 Middle East & Africa Code Repository Software Market Size by Type (2021-2026)
- 8.3 Middle East & Africa Code Repository Software Market Size by Application (2021-2026)

- 8.4 Egypt
- 8.5 South Africa
- 8.6 Israel
- 8.7 Turkey
- 8.8 GCC Countries

9 MARKET DRIVERS, CHALLENGES AND TRENDS

- 9.1 Market Drivers & Growth Opportunities
- 9.2 Market Challenges & Risks
- 9.3 Industry Trends

10 GLOBAL CODE REPOSITORY SOFTWARE MARKET FORECAST

- 10.1 Global Code Repository Software Forecast by Region (2027-2032)
 - 10.1.1 Global Code Repository Software Forecast by Region (2027-2032)
 - 10.1.2 Americas Code Repository Software Forecast
 - 10.1.3 APAC Code Repository Software Forecast
 - 10.1.4 Europe Code Repository Software Forecast
 - 10.1.5 Middle East & Africa Code Repository Software Forecast
- 10.2 Americas Code Repository Software Forecast by Country (2027-2032)
 - 10.2.1 United States Market Code Repository Software Forecast
 - 10.2.2 Canada Market Code Repository Software Forecast
 - 10.2.3 Mexico Market Code Repository Software Forecast
 - 10.2.4 Brazil Market Code Repository Software Forecast
- 10.3 APAC Code Repository Software Forecast by Region (2027-2032)
 - 10.3.1 China Code Repository Software Market Forecast
 - 10.3.2 Japan Market Code Repository Software Forecast
 - 10.3.3 Korea Market Code Repository Software Forecast
 - 10.3.4 Southeast Asia Market Code Repository Software Forecast
 - 10.3.5 India Market Code Repository Software Forecast
 - 10.3.6 Australia Market Code Repository Software Forecast
- 10.4 Europe Code Repository Software Forecast by Country (2027-2032)
 - 10.4.1 Germany Market Code Repository Software Forecast
 - 10.4.2 France Market Code Repository Software Forecast
 - 10.4.3 UK Market Code Repository Software Forecast
 - 10.4.4 Italy Market Code Repository Software Forecast
 - 10.4.5 Russia Market Code Repository Software Forecast
- 10.5 Middle East & Africa Code Repository Software Forecast by Region (2027-2032)

- 10.5.1 Egypt Market Code Repository Software Forecast
- 10.5.2 South Africa Market Code Repository Software Forecast
- 10.5.3 Israel Market Code Repository Software Forecast
- 10.5.4 Turkey Market Code Repository Software Forecast
- 10.6 Global Code Repository Software Forecast by Type (2027-2032)
- 10.7 Global Code Repository Software Forecast by Application (2027-2032)
 - 10.7.1 GCC Countries Market Code Repository Software Forecast

11 KEY PLAYERS ANALYSIS

11.1 Microsoft Corporation

- 11.1.1 Microsoft Corporation Company Information
- 11.1.2 Microsoft Corporation Code Repository Software Product Offered
- 11.1.3 Microsoft Corporation Code Repository Software Revenue, Gross Margin and Market Share (2021-2026)
- 11.1.4 Microsoft Corporation Main Business Overview
- 11.1.5 Microsoft Corporation Latest Developments

11.2 GitLab Inc.

- 11.2.1 GitLab Inc. Company Information
- 11.2.2 GitLab Inc. Code Repository Software Product Offered
- 11.2.3 GitLab Inc. Code Repository Software Revenue, Gross Margin and Market Share (2021-2026)
- 11.2.4 GitLab Inc. Main Business Overview
- 11.2.5 GitLab Inc. Latest Developments

11.3 Atlassian Corporation

- 11.3.1 Atlassian Corporation Company Information
- 11.3.2 Atlassian Corporation Code Repository Software Product Offered
- 11.3.3 Atlassian Corporation Code Repository Software Revenue, Gross Margin and Market Share (2021-2026)
- 11.3.4 Atlassian Corporation Main Business Overview
- 11.3.5 Atlassian Corporation Latest Developments

11.4 Perforce Software, Inc.

- 11.4.1 Perforce Software, Inc. Company Information
- 11.4.2 Perforce Software, Inc. Code Repository Software Product Offered
- 11.4.3 Perforce Software, Inc. Code Repository Software Revenue, Gross Margin and Market Share (2021-2026)
- 11.4.4 Perforce Software, Inc. Main Business Overview
- 11.4.5 Perforce Software, Inc. Latest Developments

11.5 OpenText Corporation

- 11.5.1 OpenText Corporation Company Information
- 11.5.2 OpenText Corporation Code Repository Software Product Offered
- 11.5.3 OpenText Corporation Code Repository Software Revenue, Gross Margin and Market Share (2021-2026)
- 11.5.4 OpenText Corporation Main Business Overview
- 11.5.5 OpenText Corporation Latest Developments
- 11.6 Broadcom Inc.
 - 11.6.1 Broadcom Inc. Company Information
 - 11.6.2 Broadcom Inc. Code Repository Software Product Offered
 - 11.6.3 Broadcom Inc. Code Repository Software Revenue, Gross Margin and Market Share (2021-2026)
 - 11.6.4 Broadcom Inc. Main Business Overview
 - 11.6.5 Broadcom Inc. Latest Developments
- 11.7 HCL Technologies Limited
 - 11.7.1 HCL Technologies Limited Company Information
 - 11.7.2 HCL Technologies Limited Code Repository Software Product Offered
 - 11.7.3 HCL Technologies Limited Code Repository Software Revenue, Gross Margin and Market Share (2021-2026)
 - 11.7.4 HCL Technologies Limited Main Business Overview
 - 11.7.5 HCL Technologies Limited Latest Developments
- 11.8 BMC Software, Inc.
 - 11.8.1 BMC Software, Inc. Company Information
 - 11.8.2 BMC Software, Inc. Code Repository Software Product Offered
 - 11.8.3 BMC Software, Inc. Code Repository Software Revenue, Gross Margin and Market Share (2021-2026)
 - 11.8.4 BMC Software, Inc. Main Business Overview
 - 11.8.5 BMC Software, Inc. Latest Developments
- 11.9 International Business Machines Corporation
 - 11.9.1 International Business Machines Corporation Company Information
 - 11.9.2 International Business Machines Corporation Code Repository Software Product Offered
 - 11.9.3 International Business Machines Corporation Code Repository Software Revenue, Gross Margin and Market Share (2021-2026)
 - 11.9.4 International Business Machines Corporation Main Business Overview
 - 11.9.5 International Business Machines Corporation Latest Developments
- 11.10 Rocket Software, Inc.
 - 11.10.1 Rocket Software, Inc. Company Information
 - 11.10.2 Rocket Software, Inc. Code Repository Software Product Offered
 - 11.10.3 Rocket Software, Inc. Code Repository Software Revenue, Gross Margin and

Market Share (2021-2026)

11.10.4 Rocket Software, Inc. Main Business Overview

11.10.5 Rocket Software, Inc. Latest Developments

11.11 Amazon Web Services, Inc.

11.11.1 Amazon Web Services, Inc. Company Information

11.11.2 Amazon Web Services, Inc. Code Repository Software Product Offered

11.11.3 Amazon Web Services, Inc. Code Repository Software Revenue, Gross

Margin and Market Share (2021-2026)

11.11.4 Amazon Web Services, Inc. Main Business Overview

11.11.5 Amazon Web Services, Inc. Latest Developments

11.12 Alibaba Cloud Computing Co., Ltd.

11.12.1 Alibaba Cloud Computing Co., Ltd. Company Information

11.12.2 Alibaba Cloud Computing Co., Ltd. Code Repository Software Product Offered

11.12.3 Alibaba Cloud Computing Co., Ltd. Code Repository Software Revenue,

Gross Margin and Market Share (2021-2026)

11.12.4 Alibaba Cloud Computing Co., Ltd. Main Business Overview

11.12.5 Alibaba Cloud Computing Co., Ltd. Latest Developments

11.13 Beijing Aosi Yangong Intelligent Technology Co., Ltd.

11.13.1 Beijing Aosi Yangong Intelligent Technology Co., Ltd. Company Information

11.13.2 Beijing Aosi Yangong Intelligent Technology Co., Ltd. Code Repository

Software Product Offered

11.13.3 Beijing Aosi Yangong Intelligent Technology Co., Ltd. Code Repository Software Revenue, Gross Margin and Market Share (2021-2026)

11.13.4 Beijing Aosi Yangong Intelligent Technology Co., Ltd. Main Business Overview

11.13.5 Beijing Aosi Yangong Intelligent Technology Co., Ltd. Latest Developments

11.14 Huawei Cloud Computing Technologies Co., Ltd.

11.14.1 Huawei Cloud Computing Technologies Co., Ltd. Company Information

11.14.2 Huawei Cloud Computing Technologies Co., Ltd. Code Repository Software Product Offered

11.14.3 Huawei Cloud Computing Technologies Co., Ltd. Code Repository Software Revenue, Gross Margin and Market Share (2021-2026)

11.14.4 Huawei Cloud Computing Technologies Co., Ltd. Main Business Overview

11.14.5 Huawei Cloud Computing Technologies Co., Ltd. Latest Developments

11.15 Tencent Holdings Limited

11.15.1 Tencent Holdings Limited Company Information

11.15.2 Tencent Holdings Limited Code Repository Software Product Offered

11.15.3 Tencent Holdings Limited Code Repository Software Revenue, Gross Margin and Market Share (2021-2026)

11.15.4 Tencent Holdings Limited Main Business Overview

- 11.15.5 Tencent Holdings Limited Latest Developments
- 11.16 Google LLC
 - 11.16.1 Google LLC Company Information
 - 11.16.2 Google LLC Code Repository Software Product Offered
 - 11.16.3 Google LLC Code Repository Software Revenue, Gross Margin and Market Share (2021-2026)
 - 11.16.4 Google LLC Main Business Overview
 - 11.16.5 Google LLC Latest Developments
- 11.17 Oracle Corporation
 - 11.17.1 Oracle Corporation Company Information
 - 11.17.2 Oracle Corporation Code Repository Software Product Offered
 - 11.17.3 Oracle Corporation Code Repository Software Revenue, Gross Margin and Market Share (2021-2026)
 - 11.17.4 Oracle Corporation Main Business Overview
 - 11.17.5 Oracle Corporation Latest Developments
- 11.18 Unity Software Inc.
 - 11.18.1 Unity Software Inc. Company Information
 - 11.18.2 Unity Software Inc. Code Repository Software Product Offered
 - 11.18.3 Unity Software Inc. Code Repository Software Revenue, Gross Margin and Market Share (2021-2026)
 - 11.18.4 Unity Software Inc. Main Business Overview
 - 11.18.5 Unity Software Inc. Latest Developments
- 11.19 Digital.ai Software, Inc.
 - 11.19.1 Digital.ai Software, Inc. Company Information
 - 11.19.2 Digital.ai Software, Inc. Code Repository Software Product Offered
 - 11.19.3 Digital.ai Software, Inc. Code Repository Software Revenue, Gross Margin and Market Share (2021-2026)
 - 11.19.4 Digital.ai Software, Inc. Main Business Overview
 - 11.19.5 Digital.ai Software, Inc. Latest Developments
- 11.20 NAVER Cloud Corp.
 - 11.20.1 NAVER Cloud Corp. Company Information
 - 11.20.2 NAVER Cloud Corp. Code Repository Software Product Offered
 - 11.20.3 NAVER Cloud Corp. Code Repository Software Revenue, Gross Margin and Market Share (2021-2026)
 - 11.20.4 NAVER Cloud Corp. Main Business Overview
 - 11.20.5 NAVER Cloud Corp. Latest Developments
- 11.21 CommitGo, Inc.
 - 11.21.1 CommitGo, Inc. Company Information
 - 11.21.2 CommitGo, Inc. Code Repository Software Product Offered

11.21.3 CommitGo, Inc. Code Repository Software Revenue, Gross Margin and Market Share (2021-2026)

11.21.4 CommitGo, Inc. Main Business Overview

11.21.5 CommitGo, Inc. Latest Developments

11.22 SourceGear LLC

11.22.1 SourceGear LLC Company Information

11.22.2 SourceGear LLC Code Repository Software Product Offered

11.22.3 SourceGear LLC Code Repository Software Revenue, Gross Margin and Market Share (2021-2026)

11.22.4 SourceGear LLC Main Business Overview

11.22.5 SourceGear LLC Latest Developments

11.23 Yandex LLC

11.23.1 Yandex LLC Company Information

11.23.2 Yandex LLC Code Repository Software Product Offered

11.23.3 Yandex LLC Code Repository Software Revenue, Gross Margin and Market Share (2021-2026)

11.23.4 Yandex LLC Main Business Overview

11.23.5 Yandex LLC Latest Developments

11.24 Harness Inc.

11.24.1 Harness Inc. Company Information

11.24.2 Harness Inc. Code Repository Software Product Offered

11.24.3 Harness Inc. Code Repository Software Revenue, Gross Margin and Market Share (2021-2026)

11.24.4 Harness Inc. Main Business Overview

11.24.5 Harness Inc. Latest Developments

11.25 Nulab Inc.

11.25.1 Nulab Inc. Company Information

11.25.2 Nulab Inc. Code Repository Software Product Offered

11.25.3 Nulab Inc. Code Repository Software Revenue, Gross Margin and Market Share (2021-2026)

11.25.4 Nulab Inc. Main Business Overview

11.25.5 Nulab Inc. Latest Developments

11.26 SberTech JSC

11.26.1 SberTech JSC Company Information

11.26.2 SberTech JSC Code Repository Software Product Offered

11.26.3 SberTech JSC Code Repository Software Revenue, Gross Margin and Market Share (2021-2026)

11.26.4 SberTech JSC Main Business Overview

11.26.5 SberTech JSC Latest Developments

12 RESEARCH FINDINGS AND CONCLUSION
