Pod coffee machine is a new kind of coffee machine. Pod coffee machine manufacturers put the coffee in a sealed aluminum or plastic Pod in advance, then filling it with nitrogen to ensure freshness, so the users can finish the brewing process simply by put the Pod in the Pod coffee machine. Compared with the ordinary coffee machine, this operation is more simply, the volume is lighter, and its costs are cheaper.

Pod coffee machines balance the convenience of instant coffee with the quality and flavour of freshly brewed drinks. They make single-serve coffees from ground beans that are sealed inside pods or capsules, which work in a similar way to packed coffee grounds in an espresso machine.³
