Cold Chain Logistic Extruded Polystyrene Sheet (XPS) is a type of thermal insulation material specifically designed for use in cold chain logistics to maintain controlled temperature conditions. The core of XPS sheets is made from extruded polystyrene foam. This material is produced through an extrusion process where polystyrene pellets are melted and then forced through a mold to form sheets. This process creates a closed-cell structure, which contributes to its insulating properties.

Technological Advancements:

Innovations in insulation materials, such as improved thermal resistance, lighter weight, and enhanced durability, will drive market growth. Advances in materials science, including the development of new polymers and composites, will also play a role.

Globalization and Trade:

Increased international trade and the growth of global supply chains will drive the demand for efficient cold chain solutions. The expansion of international markets will necessitate more robust and reliable insulation materials to maintain product integrity during transit.

E-commerce Growth:
