The global Cold-coated Fluorine Release Film market size is predicted to grow from US\$ 193 million in 2025 to US\$ 241 million in 2032; it is expected to grow at a CAGR of 3.3% from 2026 to 2032.

Cold-mount fluorine release film is a fluorine release film that is laminated at room temperature. It is a film material made of polyester film (PET) as the base material, coated with fluoroplastic release agent, and then bonded with silicone pressure-sensitive adhesive. During the laminating process, the fluorine release film does not need to be heated, but the residual heat of the silicone tape is used to closely fit the fluorine release film. Cold-mount fluorine release film is suitable for composite die-cutting and stamping of high-temperature silicone rubber pressure-sensitive tape, as well as laminating processing of various silicone products, such as 3M silicone double-sided tape 9731, 3M9119, 3M4377, etc.
