Cold meats also known as lunch meats, cold cuts , cooked meats, sliced meats, luncheon meats and deli meats—are precooked or cured meats that are sliced and served cold or hot. They are typically served in sandwiches or on party trays. They can be purchased pre-sliced, usually in vacuum packs, or they can be sliced to order.

The global market for cold meats, also known as deli meats or charcuterie, has been growing steadily in recent years. One major factor driving this growth is the increasing demand for convenient and nutritious ready-to-eat food options. Additionally, the rising popularity of protein-rich diets, such as the paleo and ketogenic diets, has also contributed to the growth of the cold meats market. Some of the major players in the global cold meats market include JBS SA, Tyson Foods Inc., Smithfield Foods Inc., Seaboard Corp., and NH Foods Ltd. North America and Europe are currently the largest markets for cold meats, with the United States being the biggest market globally. However, there is also a growing demand for cold meats in developing regions, such as Asia-Pacific and Latin America. The market for cold meats is expected to continue growing in the coming years, with a focus on product innovation and expanding distribution channels to reach new customers. However, there are also significant challenges for the industry, such as concerns over food safety and sustainability, which will need to be addressed in order to maintain consumer trust and confidence in the product category.
