The global Cold Pressed Rice Bran Oil market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

Cold Pressed Rice Bran Oil is a cooking oil extracted from the outer layer of rice grains through a cold-pressing process. Unlike traditional refining methods, cold pressing retains the oil's natural nutrients, antioxidants, and flavor. Rich in vitamin E and other beneficial compounds, this oil is known for its mild taste, high smoke point, and potential health benefits. It is commonly used in culinary applications, including frying, sautéing, and salad dressings, offering a healthier alternative with a balanced fatty acid profile.

The industry trend for cold pressed rice bran oil revolves around health-conscious consumer choices. There's a growing demand for natural and minimally processed oils with inherent nutritional benefits. Consumers are increasingly drawn to cold pressed oils due to their perceived health advantages, such as antioxidants and heart-friendly fatty acids. Manufacturers are responding by enhancing production transparency, promoting sustainability, and exploring innovative packaging to meet the rising consumer preference for clean-label and eco-friendly products. The trend aligns with a broader shift towards healthier dietary options and sustainable food practices.
