## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Cold Rolling Coil is a product obtained by rolling hot-rolled coils at room temperature below the recrystallization temperature. Mostly used for architectural decoration, electrical products, etc. Cold rolling is rolling at the recrystallization temperature, but is generally understood as rolling using a material rolled at room temperature. Since there is no heating in the production process, there are no defects such as pitting and iron oxide scale that often occur in hot rolling, and the surface quality is good and the finish is high.

The global market for Cold Rolling Coil is estimated to increase from US\$ million in 2021 to reach US\$ million by 2028, exhibiting a CAGR of % during 2022-2028. Keeping in mind the uncertainties of COVID-19 and Russia-Ukraine War, we are continuously tracking and evaluating the direct as well as the indirect influence of the pandemic on different end use sectors. These insights are included in the report as a major market contributor.

The APAC Cold Rolling Coil market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.

The United States Cold Rolling Coil market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.
