The global Cold Spray Additive Manufacturing market size is predicted to grow from US$ 230 million in 2025 to US$ 367 million in 2031; it is expected to grow at a CAGR of 8.1% from 2025 to 2031.

Cold Spray Additive Manufacturing (CSAM) Service is a specialized manufacturing process that uses a supersonic gas jet to accelerate metal or composite powder particles, which then bond upon impact with a substrate to form a dense, solid layer. Unlike traditional additive manufacturing techniques that rely on melting or sintering, CSAM operates at lower temperatures, preserving the material's original properties while minimizing thermal distortion and oxidation. This technology is widely used for repairing, coating, and fabricating complex metal components in industries such as aerospace, defense, and energy, offering benefits like high deposition rates, reduced material waste, and enhanced mechanical properties.

United States market for Cold Spray Additive Manufacturing is estimated to increase from US$ million in 2024 to US$ million by 2031, at a CAGR of % from 2025 through 2031.

China market for Cold Spray Additive Manufacturing is estimated to increase from US$ million in 2024 to US$ million by 2031, at a CAGR of % from 2025 through 2031.
