Cold stamping forming composite hard sheet is a composite material designed for pharmaceutical packaging. It is manufactured using a cold stamping process and is usually laminated with multiple layers of different materials to meet the safety and stability requirements of drugs. The hard sheet has excellent mechanical strength and barrier properties, which can effectively prevent drug oxidation, deliquescence and contamination, ensuring the quality of drugs during storage and transportation. Its light weight and customizability make it suitable for packaging needs of various drugs, including solid drugs, granules and tablets. In addition, cold stamping forming composite hard sheets also meet relevant hygiene and environmental protection standards and are widely used in the pharmaceutical industry, enhancing the market competitiveness of drugs.
