Scar treatment is a technique that is utilized to limit the scars marks so that it seem more consistent with the skin tone and surface surrounding. Scars are marks that stay after a wound recovers and unavoidable aftereffects of damage or surgery. Scars are of different types, which includes keloid scars, contracture scars, hypertrophic scars and acne scars. Combination therapeutics are one of the most adopted treatment option for different scars. As of now, there are no standard rules for the scar treatment and these procedures are done on a best-effort ground. Notwithstanding, under the U.K. government's cosmetic intervention rules, patient and patient require access to evidence-based and confirm based data to frame their choices. A significant number of these scar treatment and stylish beautification techniques are considered as ‘consumer
