## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Commercial asset finance is a type of secured business loan that allows a business to buy assets without the upfront costs of large purchases.

Owners often want to grow their businesses, take advantage of immediate opportunities or buy equipment without delay. Asset finance allows you to buy what you need and spread the cost over several years with affordable monthly repayments. This has the added benefit of not tying up other lines of credit or using all the business' spare cash.

With commercial asset finance, a company can add or replace equipment, buy vehicles or refit their premises, enabling them to expand or keep up with the market. A lender purchases the assets a business needs and then leases them back through fixed monthly payments over an agreed period.

The global Commercial Asset Finance market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of %from 2024 to 2030.
