A Commercial Flight Type Dishwasher is a high-capacity, automated dishwasher designed for large-scale commercial kitchens. Unlike other types of dishwashers, a flight type dishwasher uses a continuous conveyor system, often referred to as a 'flight,' that transports racks or trays of dishes through multiple wash, rinse, and sanitization zones. It is known for its ability to wash large volumes of dishware at high speeds, making it ideal for operations such as hotels, large restaurants, hospitals, and food processing plants, where high throughput is required. The dishes are loaded at one end and automatically moved through the entire washing process, exiting cleaned and sanitized at the other end.
