A commercial juicer is a device that extracts juice from vegetables and fruits. Commercial juicers are generally used by restaurants, cafes, bars, schools, or other large institutions that need to juice huge quantities of produce. Because they can handle these heavy demands, commercial juicers tend to be larger than their household counterparts. Their powerful motors also make them more expensive than smaller appliances like personal blenders or citrus presses.

Commercial juicers have one simple function: extract the maximum amount of juice from fruits, herbs, greens and vegetables - ideally as quickly as possible. To do this, there are three main types of juicing machine: citrus, centrifugal and masticating.
