The global Commercial Leaf Blower market size is predicted to grow from US\$ 5308 million in 2025 to US\$ 8124 million in 2032; it is expected to grow at a CAGR of 6.4% from 2026 to 2032.

A Commercial Leaf Blower is a high-power outdoor cleaning device used for removing leaves, debris, dust, grass clippings, and light snow in commercial environments. It is stronger and more durable than residential leaf blowers. Commonly used by landscaping companies, municipal maintenance teams, facility managers, and professional groundskeepers. Overall average price: ~US\$600 per unit. Global production: 8.5 million units. Average: 32%. Upstream: 2-stroke/4-stroke engines, electric motors, lithium battery packs, plastic housing, impellers, filters, controllers. Midstream: Leaf blower assembly, quality testing, engine calibration, battery management integration. Downstream: Landscaping companies, municipalities, commercial cleaning contractors, rental companies, hardware stores.

Rapid shift from gas to battery-powered blowers due to regulations and noise restrictions. Municipalities increasingly ban gas-powered models ? battery commercial blowers grow fastest. Higher air volume (CFM) and better ergonomics drive product differentiation. Landscaping outsourcing in North America and Europe boosts commercial demand. Smart / connected blowers with fleet management emerging.
