The need to capture, store, filter and reuse rainfall is becoming more and more important. As water companies increase their prices and the population grows, demands on mains water continue to rise. Coupled with consumer demand for companies to reduce their environmental impact, rainwater harvesting is increasingly sought after by both the general public and commercial organisations and is starting to become the first solution in water management strategies at government level. Commercial Rainwater Harvesting Systems efficiently collect large amounts of rainwater. repurposing that water into a variety of applications. Rainwater harvesting helps businesses conserve millions of gallons of water over the lifetime of their system, saving them money at the same time. By utilizing large-scale rainwater harvesting systems, companies can manage stormwater runoff onsite by alleviating a large section of impervious area from their management plan. Rainwater harvesting isn't just an environmentally sound thing to do, it's economically beneficial as well.
