A fully programmed robot that is intended to perform a specific task to ease the human efforts along with high productivity is termed as robots. These robots are then utilized for the personal usage or to carry out the heavy duty tasks. The era of automation has already arrived, but it is evolving moderately. Robots have already taken over the commercial process and production lines, which in result has turned out to be productive and fruitful in terms of production figures, quality, and cost. Commercial robots are dedicatedly programmed to accomplish any task that has been assigned to ease the complexities of bulk manufacturing. In the current stage, commercial robots have also been recognized as surveillance and monitoring mechanism that can significantly reduced the error occurrence.
