This study focuses on commercial-grade equipment systems used in health clubs, gyms, hotels, multifamily fitness rooms, corporate wellness centers, university recreation facilities, military and fire-training facilities, and selected wellness or rehabilitation fitness environments. Typical products are built with commercial steel frames, durable drive and braking systems, adjustable speed or resistance control, safety stop mechanisms, handrails, consoles, workout data tracking, heart-rate monitoring, and, in some models, connected entertainment or facility management functions.
