A commercial vehicle retarder is a braking system designed specifically for large commercial vehicles, such as trucks and buses, to enhance braking efficiency and safety. Unlike conventional brakes, which rely solely on friction, retarders use mechanisms like hydraulic resistance or engine braking to help slow down the vehicle. This reduces the strain on conventional braking systems, prevents brake fade during prolonged use, and provides more controlled deceleration, especially on downhill slopes. Common types include exhaust brakes, engine brakes, and hydraulic retarders, all aimed at improving vehicle performance and prolonging brake life in demanding commercial applications.
