The conventional label paper of automatic weighing labeling machine includes plain paper, coated paper, metal foil, and composite paper, which can be used to make labels. We can choose according to the printing method and the type of adhesive used, and the printing method should be based on Depending on the color requirements of the label pattern and the cost of printing, composite materials like metal boxes and it can produce labels that can be combined with recesses or patterns to form special decorative effects. For example, metallic luster, since the metal is affected by water washing, it is often used as a longevity label on the surface of products or containers. And our automatic weighing and labeling machine often uses plastic shrink film as armband for various packaging containers. It has the advantages of good decoration effect, convenient and reliable operation and large-scale production.
