Compact centrifugal fans are undisputed experts in high static pressure applications. Air flows in axially, bends 90 degrees, and then flows out radially. The impeller is optimized for aerodynamics and is suitable for highly compact 1U and 2U rack mounted servers, with a variety of sizes and configurations to choose from. Compact centrifugal fans are mainly composed of impellers, motors, air ducts, and other parts. Its structural design is compact, with a small overall size, making it easy to install and layout. Meanwhile, the compact structure also helps to reduce the vibration and noise of the fan, and improve the operational stability of the fan.
