A compact fume extractor is a small, portable device designed to remove hazardous fumes, smoke, and airborne particles from the air in work environments where activities such as soldering, welding, or chemical processing occur. These extractors use powerful fans and filtration systems, including HEPA filters and activated carbon filters, to capture and neutralize contaminants, ensuring a safer and cleaner workspace. Their compact size allows them to be easily positioned close to the source of fumes and moved as needed, making them ideal for use in confined or dynamic workspaces. Compact fume extractors enhance workplace safety by reducing the risk of inhalation of harmful substances and improving overall air quality.
