The global Compression Limiter market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

Compression limiters are a type of insert or bushing designed to maintain joint integrity of Compression limiters from Spirola plastic assembly when tightening bolts or screws. They protect plastic parts from damage due to compression by limiting the force that gets applied to the plastic by the assembly fasteners. Compression limiters are designed for applications where the tightening load of the bolt or screw will compress, crack, or otherwise damage the plastic component. They provide a strong and reliable defense against the stresses caused by fastener torque.
