Conceal Zipper is a kind of nylon zipper, which is composed of chain teeth, sliders, limit codes (front code and rear code) or locking parts. Among them, the chain teeth are the key part, which directly determines the side pull strength of the zipper. Generally, the invisible zipper has two chain belts, and each chain belt has a row of chain teeth, and the two rows of chain teeth are arranged alternately. Invisible zippers are mainly used in down jackets, denim clothes, leather clothes, high-end jackets, cold-proof clothes, etc. Compared with nylon zippers and resin zippers, it is stronger and more expensive, and it is mostly used on jeans, coats and backpacks.

The global apparel industry as a whole is on a downward trend, and the overall output of the domestic apparel market is also on a downward trend. Therefore, the growth rate of the Conceal Zipper industry has slowed down.
