The global Concealed Air Unit market size is predicted to grow from US$ 2062 million in 2025 to US$ 3686 million in 2032; it is expected to grow at a CAGR of 8.8% from 2026 to 2032.

In 2024, global sales of Concealed Air Unit reached approximately 1.1 miilion units, with an average market price of about USD 1,836 per unit, an annual production capacity of roughly 1.5 million units, and an industry-average gross margin of approximately 35%.

These units are primarily used in commercial buildings, hotels, office towers, and high-end residential spaces. The design conceals the air conditioning system within the ceiling, leaving only the supply and return air grilles visible, thereby saving space and enhancing interior aesthetics. Concealed Air Units typically feature ducted systems with both heating and cooling functions, supporting centralized control systems suitable for multi-zone temperature control needs. Production capacity is concentrated in regions such as China, Japan, and the United States, with leading manufacturers including Daikin, Mitsubishi Electric.

In the supply chain, the upstream consists of suppliers of key components like compressors, fans, electronic control systems, and heat exchangers; and the downstream involves construction contractors, design institutes, real estate developers, and end-users. The cost structure comprises approximately 60% for core components, 20% for labor and R&D, and 20% for sales and administrative expenses. Downstream consumption is primarily concentrated in commercial real estate and high-end residential projects, with demand continuing to grow as urbanization progresses.

United States market for Concealed Air Unit is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
