A Concealed Fastener Panel is a type of metal panel used in construction for roofing or siding, known for its sleek, modern appearance and durability. Unlike traditional metal panels that use exposed fasteners (screws or nails) to attach the panel to the structure, concealed fastener panels have their fasteners hidden, usually under overlapping panels. This creates a clean, uninterrupted look on the surface of the panel, enhancing its aesthetic appeal. Concealed fastener panels are often made of materials like steel, aluminum, or copper and are used in a variety of architectural styles, from residential homes to commercial buildings.

The global Concealed Fastener Panel market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
