## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

A concrete agitating equipment is a device that homogeneously combines cement, aggregate such as sand or gravel, and water to form concrete. A typical concrete mixer uses a revolving drum to mix the components. For smaller volume works portable concrete mixers are often used so that the concrete can be made at the construction site, giving the workers ample time to use the concrete before it hardens.

The global market for Concrete Agitating Equipment is estimated to increase from US\$ million in 2021 to reach US\$ million by 2028, exhibiting a CAGR of % during 2022-2028. Keeping in mind the uncertainties of COVID-19 and Russia-Ukraine War, we are continuously tracking and evaluating the direct as well as the indirect influence of the pandemic on different end use sectors. These insights are included in the report as a major market contributor.

The APAC Concrete Agitating Equipment market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.
