The global Concrete Repair Mortars market size is predicted to grow from US\$ 1700 million in 2025 to US\$ 2309 million in 2031; it is expected to grow at a CAGR of 5.2% from 2025 to 2031.

Concrete is strong in compression, but comparatively weak in tension. The inclusion of steel reinforcement improves the tensile strength of the element and, consequently, its resistance to stress. Unfortunately, in the presence of water and oxygen, steel corrodes. Therefore, in almost all likely exposure conditions for reinforced concrete, corrosion of the steel is a potential hazard. This report studies Concrete Repair Mortars market. Concrete structures are prone to deterioration owing to several factors such as water infiltration, corrosion, structural damage or others. Concrete repair mortar material mends and protects the concrete structures by providing fortification against cracking, restricting corrosion, and chemical anchoring. With benefits such as enhanced bond strength, lowered shrinkage, impermeability, density, tensile strength, and thixotropy, concrete repair mortars are highly useful for several industries such as road and infrastructure, marine structures, utility, and building and construction.

Global concrete repair mortars key players include Sika(Parex), MBCC(BASF), Saint-Gobain Weber, etc. United States top 3 manufacturers hold a share about 45%.Europe is the largest market, with a share about 33%, followed by Asia Pacific and North America with the share about 32% and 27%. In terms of product, polymer-modified cementitious mortar is the largest segment, with a share over 65%. And in terms of application, the largest application is road & infrastructure, followed by building & car park .
