The global Condensing Oil Boiler market size is predicted to grow from US\$ 503 million in 2025 to US\$ 605 million in 2031; it is expected to grow at a CAGR of 3.1% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Oil condensing boilers are water heaters fueled by oil. They achieve high efficiency (typically greater than 90% on the higher heating value) by condensing water vapour in the exhaust gases and so recovering its latent heat of vaporisation, which would otherwise have been wasted. This condensed vapour leaves the system in liquid form, via a drain. In many countries, the use of condensing boilers is compulsory or encouraged with financial incentives.

The oil condensing boilers is classified into the floor standing boiler and wall mounted boiler according to the product type. As of 2019, floor standing oil condensing boilers segment dominates the market contributing more than 73% of the total market share.

The oil condensing boilers market is concentrated market; key players include Worcester Bosch, Wolf GmbH, Viessmann, Grant Engineering, KD Navien, August Broetje GmbH, ELCO, De Dietrich Heating, Hoval, ROTEXP, FERROLI, Mistral Boilers, MHG Heating; the revenue of top five manufacturers accounts about 52% of the total revenue, in 2019.
