Cone lined caps are used for exceptionally tight seal to prevent leakages. Cone lined caps offer a good chemical barrier.

The liner in the cone lined caps molds itself around the sealing areas as the cap is screwed on. The cone lined caps eliminate leakage, contamination, evaporation, backing off and binding. Cone lined caps are made from phenolic plastic (polypropylene) and the liner is made from oil-resistant plastic. Cone lined caps are an ideal choice for bottling viscous products such as oils, liquids and soaps. Cone lined caps are durable in nature and offer a tight seal. Cone lined caps are threaded closures that seal on the top and inside diameter of the bottle to ensure additional leak protection.
