Construction crane cameras are industrial video monitoring devices installed on construction lifting equipment such as tower cranes and gantry cranes. These cameras, made of shock-resistant, dustproof, and waterproof material, capture real-time images of the hook, the load, and blind spots, transmitting the images to the operator's cab or a remote monitoring terminal. This assists the operator in precise lifting and improves operational safety. Upstream suppliers include those providing industrial camera modules, wide-angle/zoom lenses, protective housings, wireless transmission modules, cables, and display terminals. Downstream customers are primarily general contractors for construction projects, equipment leasing companies, and tower crane manufacturers. In 2024, the global market price for construction crane cameras was \$1,500 per unit, with sales of approximately 270,000 units and an industry profit margin of 20-25%.
