Moisture-proof boards originated in Europe.

The global chemical industry is part of the global economic development, and the cyclical economic development envelopes the global chemical industry. In recent years, global economic growth has slowed down, and the growth rate of the chemical industry has also gradually slowed down. The development of emerging economies such as China and India has continued to promote the global chemical industry to maintain a certain development trend in the past few years. In the future, these economies will continue to drive the chemical industry market forward with their large population base and strong domestic demand growth. In addition to the influence of the geopolitical characteristics of the Middle East, the shale gas industry in the United States among developed countries has become the biggest variable in recent years, driving the strong development of the U.S. chemical industry.
