the global total. The second is Europe, accounting for 23% of the global market.

Currently, the world's major manufacturers include Apple, Samsung, Huawei, Dell, Xiaomi, etc., and the top five manufacturers account for more than 46% of the market share.

Market Challenges and Opportunities

Challenges: The main challenges facing the current consumer electronics repair and maintenance market include opaque prices, asymmetric information, a chaotic workforce and lack of supervision, and scattered repairs without guarantees. These problems cause consumers to face difficulties in choosing repair services and also affect the healthy development of the market.

Opportunities: With the improvement of consumers' requirements for product quality and services and the enhancement of environmental awareness, the consumer electronics repair and maintenance market has ushered in more development opportunities. On the one hand, business giants have intervened in this market, promoting the integration and standardized development of the industry; on the other hand, the rise of the Internet O2O repair model has also brought new growth points to the market. In addition, with the popularization of new technologies such as 5G and the Internet of Things and the diversification and complexity of the functions of consumer electronics products, higher requirements are put forward for the technical level of repair services, which also provides more development space for the market.
