Contact force (CF) is a relatively new technology that provides real-time feedback on catheter-tissue contact during radiofrequency (RF) ablation.

Atrial fibrillation (AF) is one of the common arrhythmias. Catheter radiofrequency ablation is a only effective therapeutic method of AF currently. Contact force sensing catheter can real time monitoring the pressure of catheter tip, which can help operators to understand the contact force between atrial and ablation points, and guide the atrial fibrillation ablation. It is significantly improved the effectiveness and safety of the atrial fibrillation.
