The continuous high-speed cartoning machine is an uninterrupted and continuous carton packaging machine. Its speed is much higher than that of the intermittent cartoning machine. The speed is usually above 150 boxes/minute, so it is also called high-speed cartoning machine.

This cartoning machine is suitable for cartoning medicine plates, hoses, bottles and similar items. It can run cartoning continuously to improve packaging efficiency and ensure packaging quality. It is a high-tech product with motor integration that can automatically complete tasks such as folding instructions, opening cartons, boxing sections, printing batch numbers, and sealing. Moreover, it adopts high-frequency speed regulation, human-machine interface PLC control, and photoelectric monitoring of the movements of each part. If an abnormality occurs during operation, it can automatically stop and display the cause, so as to eliminate faults in time.

The global Continuous High Speed Cartoning Machine market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of %from 2024 to 2030.
