Contract freeze drying service is a professional drying technology solution. Its core lies in freezing and sublimating the water in the material at low temperature through freeze drying technology, thereby removing the water and achieving the purpose of drying. This service is widely used in many fields such as food, pharmaceuticals, cosmetics, biological products, pesticides, etc.

Contract freeze drying services are driven by increasing consumer demand for long-lasting, high-quality food and pharmaceutical products, advancements in lyophilization technology, the substantial growth of the biopharmaceutical market (especially for vaccines and biologics), and a general trend of outsourcing complex manufacturing processes. The need for shelf-stable products without preservatives, coupled with advancements in automation and process control for freeze-drying systems, also fuels this demand.
