## Abstracts

The global Controlled Release Cannabis Pills market size is predicted to grow from US\$ million in 2025 to US\$ million in 2031; it is expected to grow at a CAGR of % from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Cannabis is a psychoactive drug extracted from a genus of flowering plant of Cannabaceae family. It is also called as, marijuana. Over the last few decades use of cannabis for the medical purpose has increased and is described as medical marijuana. Increasing research in this area has suggested that it can be prescribed to treat a number of health conditions such as, chronic pain, insomnia, muscle spasm, and reduce nausea and vomiting during chemotherapy among other health conditions. Companies are increasingly investing on the research in the field of medical marijuana or cannabis. These research has led to the development of controlled release cannabis pills that can provide long lasting effect.

Controlled release cannabis pills market is expected to show a significant growth over the forecast period owing to the increasing adoption of controlled release cannabis pills or capsule among people and prescribers as these drugs has lower side effects and can be used without much of the concern of feeling of unease. Long lasting effect of controlled release cannabis pills and increasing number of government legalizing distribution of medical marijuana is also expected to fuel the growth of controlled release cannabis pills market. Even though number of government legalizing the medical marijuana is increasing but regulatory bodies are posing as a restraint for the

growth of controlled release cannabis pill market as they cannot legalize the use of narcotic substances under federal law.
