A convection oven is an oven that uses convection heating technology to distribute heat by forced circulation of air, ensuring that the food is evenly heated in all parts of the oven. This type of oven usually has a built-in fan to blow hot air to all corners of the oven, thus avoiding the uneven baking problem caused by the large temperature difference between the top and the bottom of the oven in traditional ovens.

The global Convection Ovens market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of %from 2024 to 2030.
