Abstracts

The global Conventional GM Cryocoolers market size is predicted to grow from US$ 374 million in 2025 to US$ 540 million in 2032; it is expected to grow at a CAGR of 5.3% from 2026 to 2032.

Conventional GM Cryocoolers, also referred to GM Cryogenic Refrigerators or GM cryocoolers, are mechanical cryogenic refrigeration systems that use helium as the principal working fluid and employ a closed-cycle helium compressor, high- and low-pressure gas lines, and a cryogenic cold head to provide continuous refrigeration. Under the broad market scope adopted in this report, the category comprises conventional Conventional GM Cryocoolers, GM-type pulse tube cryocoolers, and Gifford-McMahon/Joule-Thomson refrigerators. During operation, helium circulates within a sealed system and removes heat through compression, expansion, regenerative heat exchange, pressure oscillation, or throttling processes, enabling stable cryogenic cooling without the continuous consumption of liquid nitrogen or liquid helium.

In 2025, global Conventional GM Cryocoolers production reached approximately 21.9 k units, with an average global market price of around US$ 24.6 k per unit

The principal upstream materials include oxygen-free high-conductivity copper for cold tips, heat exchangers, thermal links and bus structures; stainless steel and nickel-alloy precision tubes for pressure cylinders, displacers, gas lines and structural components; stainless-steel mesh, phosphor-bronze mesh, lead particles and rare-earth compounds for regenerators; engineering plastics and composite materials for displacer bodies and thermal insulation; lubricants, adsorbents and oil-separation materials for helium compressors; and precision valves, motors, bearings, seals, sensors, electronic

+357 96 030922
info@marketpublishers.com

controllers and power modules. Representative oxygen-free copper suppliers include Mitsubishi Materials and Luvata; Mitsubishi Materials describes oxygen-free copper as a high-purity material with high electrical and thermal conductivity. Alleima is a representative supplier of seamless and redrawn stainless-steel and nickel-alloy precision tubing

Representative downstream users include Siemens Healthineers, GE HealthCare, Applied Materials, Lam Research, Tokyo Electron and KLA, etc.

The gross margin of Conventional GM Cryocoolers are generally estimated at approximately 25%–45%.

Conventional GM Cryocoolers are mechanical cryogenic refrigeration systems that use a closed helium cycle, a regenerator and a reciprocating displacer to provide continuous low-temperature cooling. By operating-temperature range, the market is divided into Under 10K or 10K, 10.1K-30K and Above 30K products. Under 10K or 10K systems are generally based on two-stage refrigeration structures and are designed for superconducting magnets, low-temperature physics and other deep-cryogenic applications. They require advanced regenerator materials, precision manufacturing and high long-term reliability, making them one of the most technically demanding product categories.

The principal downstream applications are MRI and NMR, Scientific Instruments and Laboratory Cryostats, Cryopumps and Vacuum Systems, and Others. MRI and NMR applications include medical magnetic resonance imaging systems and analytical nuclear magnetic resonance spectrometers, where Conventional GM Cryocoolers continuously cool superconducting magnets, reduce helium boil-off and support low-helium or cryogen-free system designs. Scientific Instruments and Laboratory Cryostats cover laboratory cryostats, superconducting magnet platforms, material-property measurement systems, quantum research, spectroscopy, detector testing and cryogenic microscopy. This segment is characterized by diversified specifications, relatively limited production volumes and a high degree of customization. Cryopumps and Vacuum Systems use Conventional GM Cryocoolers to create cryogenic condensation and adsorption surfaces for semiconductor manufacturing, display production, optical coating, electronic-device processing and scientific vacuum systems.

The global Closed Cycle Gifford-Mcmahon Cryocooler market is characterized by high technical barriers and demanding customer-qualification requirements. Major participants include Sumitomo Heavy Industries, Edwards Vacuum LLC, ULVAC

+357 96 030922
info@marketpublishers.com

CRYOGENICS, Bluefors Oy through Cryomech, Pengli Technology, Bwokai Technologies, Suzhou Bama Superconductive Technology, Hynhe Technology, Advanced Research System and Oxford Cryosystems. Leading manufacturers generally possess extensive cryogenic engineering experience, proprietary cold-head and compressor technologies, broad product portfolios, long-term reliability records and international service capabilities. Their ability to supply cold heads, helium compressors, gas lines, controllers and system-integration support creates substantial competitive advantages. Chinese manufacturers are progressively establishing domestic Closed Cycle Gifford-Mcmahon Cryocooler product lines and expanding into scientific instruments, cryogenic vacuum equipment, superconducting systems and import-substitution projects, although further progress is still required in advanced regenerator materials, ultra-low-vibration design, extended operating life and international customer qualification.

Market growth is supported by multiple driving factors. Expansion of the installed base of medical magnetic resonance imaging equipment and the transition toward low-helium and cryogen-free superconducting magnet systems are increasing demand for closed-cycle refrigeration. Continued development of quantum computing, quantum sensing, superconducting detection and cryogenic material research is encouraging laboratories and research institutions to deploy more low-temperature platforms. Sustained demand for high-vacuum processing in semiconductor, display and advanced electronic-device manufacturing supports the market for cryopumps and their integrated GM refrigeration units. Helium-price volatility and concerns regarding helium-supply security are encouraging users to adopt helium recondensation and closed-cycle refrigeration systems. In addition, improvements in cold-head lifetime, compressor efficiency, vibration management, digital controls and remote condition monitoring are enhancing system reliability and expanding addressable applications.

The market also faces several restraints. Conventional GM Cryocoolers contain precision displacers, regenerators, rotary valves and helium compressors, resulting in demanding manufacturing tolerances and relatively high production costs. Deep-cryogenic models depend on specialized rare-earth regenerator materials, precision machining and low-temperature sealing technologies, creating potential supply-chain constraints. Long product-lifetime testing, application matching and customer-qualification procedures make it difficult for new entrants to obtain approvals from medical, semiconductor and major scientific-equipment customers. Furthermore, fluctuations in medical-equipment investment, semiconductor capital expenditure and the approval schedules of large scientific projects can create cyclical and project-related volatility in market demand.

Report Scope

LP Information, Inc. (LPI) ' newest research report, the “Conventional GM Cryocoolers Industry Forecast” looks at past sales and reviews total world Conventional GM Cryocoolers sales in 2025, providing a comprehensive analysis by region and market sector of projected Conventional GM Cryocoolers sales for 2026 through 2032. With Conventional GM Cryocoolers sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US$ millions of the world Conventional GM Cryocoolers industry.

This Insight Report provides a comprehensive analysis of the global Conventional GM Cryocoolers landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Conventional GM Cryocoolers portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms’ unique position in an accelerating global Conventional GM Cryocoolers market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Conventional GM Cryocoolers and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Conventional GM Cryocoolers.

This report presents a comprehensive overview, market shares, and growth opportunities of Conventional GM Cryocoolers market by product type, application, key manufacturers and key regions and countries.

Market Segmentation

Segmentation by Type:

Under 10K or 10K

10.1K-30K

+357 96 030922
info@marketpublishers.com

Above 30K

Segmentation by Number of Cooling Stages:

Single-Stage Gifford-McMahon Cryocooler

Two-Stage Gifford-McMahon Cryocooler

Segmentation by End-use Industry:

Semiconductor and Electronic Device Manufacturing

Medical and Life Sciences

Research and Development

Energy and Superconducting Technology

Industrial Gases and Cryogenic Processing

Others

Segmentation by Application:

MRI and NMR

Scientific Instruments and Laboratory Cryostats

Cryopumps and Vacuum Systems

Others

This report also splits the market by region:

The below companies that are profiled have been selected based on inputs gathered from primary experts and analysing the company's coverage, product portfolio, its market penetration.

Sumitomo Heavy Industries (SHI)

Edwards Vacuum LLC

ULVAC CRYOGENICS

Bluefors Oy (Cryomech)

Pengli Technology

Bwokai Technologies

Suzhou Bama Superconductive Technology

Hynhe Technology

Advanced Research System

Oxford Cryosystems

Key Questions Addressed in this Report

What is the 10-year outlook for the global Conventional GM Cryocoolers

+357 96 030922
info@marketpublishers.com

market?

What factors are driving Conventional GM Cryocoolers market growth, globally and by region?

Which technologies are poised for the fastest growth by market and region?

How do Conventional GM Cryocoolers market opportunities vary by end market size?

How does Conventional GM Cryocoolers break out by Type, by Application?

+357 96 030922

Contents

1 SCOPE OF THE REPORT

1.1 Market Introduction
1.2 Years Considered
1.3 Research Objectives
1.4 Market Research Methodology
1.5 Research Process and Data Source
1.6 Economic Indicators
1.7 Currency Considered
1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

2.1 World Market Overview
  2.1.1 Global Conventional GM Cryocoolers Annual Sales 2021-2032
  2.1.2 World Current & Future Analysis for Conventional GM Cryocoolers by Geographic Region, 2021, 2025 & 2032
  2.1.3 World Current & Future Analysis for Conventional GM Cryocoolers by Country/Region, 2021, 2025 & 2032
2.2 Conventional GM Cryocoolers Segment by Type
  2.2.1 Under 10K or 10K
  2.2.2 10.1K-30K
  2.2.3 Above 30K
  2.2.4 Conventional GM Cryocoolers Sales by Type
    2.2.4.1 Global Conventional GM Cryocoolers Sales Market Share by Type (2021-2026)
    2.2.4.2 Global Conventional GM Cryocoolers Revenue and Market Share by Type (2021-2026)
    2.2.4.3 Global Conventional GM Cryocoolers Sale Price by Type (2021-2026)
2.3 Conventional GM Cryocoolers Segment by Number of Cooling Stages
  2.3.1 Single-Stage Gifford-McMahon Cryocooler
  2.3.2 Two-Stage Gifford-McMahon Cryocooler
  2.3.3 Conventional GM Cryocoolers Sales by Number of Cooling Stages
    2.3.3.1 Global Conventional GM Cryocoolers Sales Market Share by Number of Cooling Stages (2021-2026)
    2.3.3.2 Global Conventional GM Cryocoolers Revenue and Market Share by Number of Cooling Stages (2021-2026)

+357 96 030922
info@marketpublishers.com

2.3.3.3 Global Conventional GM Cryocoolers Sale Price by Number of Cooling Stages (2021-2026)
2.4 Conventional GM Cryocoolers Segment by End-use Industry
2.4.1 Semiconductor and Electronic Device Manufacturing
2.4.2 Medical and Life Sciences
2.4.3 Research and Development
2.4.4 Energy and Superconducting Technology
2.4.5 Industrial Gases and Cryogenic Processing
2.4.6 Others
2.4.7 Conventional GM Cryocoolers Sales by End-use Industry
2.4.7.1 Global Conventional GM Cryocoolers Sales Market Share by End-use Industry (2021-2026)
2.4.7.2 Global Conventional GM Cryocoolers Revenue and Market Share by End-use Industry (2021-2026)
2.4.7.3 Global Conventional GM Cryocoolers Sale Price by End-use Industry (2021-2026)
2.5 Conventional GM Cryocoolers Segment by Application
2.5.1 MRI and NMR
2.5.2 Scientific Instruments and Laboratory Cryostats
2.5.3 Cryopumps and Vacuum Systems
2.5.4 Others
2.5.5 Conventional GM Cryocoolers Sales by Application
2.5.5.1 Global Conventional GM Cryocoolers Sale Market Share by Application (2021-2026)
2.5.5.2 Global Conventional GM Cryocoolers Revenue and Market Share by Application (2021-2026)
2.5.5.3 Global Conventional GM Cryocoolers Sale Price by Application (2021-2026)

3 GLOBAL BY COMPANY

3.1 Global Conventional GM Cryocoolers Breakdown Data by Company
3.1.1 Global Conventional GM Cryocoolers Annual Sales by Company (2021-2026)
3.1.2 Global Conventional GM Cryocoolers Sales Market Share by Company (2021-2026)
3.2 Global Conventional GM Cryocoolers Annual Revenue by Company (2021-2026)
3.2.1 Global Conventional GM Cryocoolers Revenue by Company (2021-2026)
3.2.2 Global Conventional GM Cryocoolers Revenue Market Share by Company (2021-2026)
3.3 Global Conventional GM Cryocoolers Sale Price by Company

+357 96 030922
info@marketpublishers.com

3.4 Key Manufacturers Conventional GM Cryocoolers Producing Area Distribution, Sales Area, Product Type
3.4.1 Key Manufacturers Conventional GM Cryocoolers Product Location Distribution
3.4.2 Players Conventional GM Cryocoolers Products Offered
3.5 Market Concentration Rate Analysis
3.5.1 Competition Landscape Analysis
3.5.2 Concentration Ratio (CR3, CR5 and CR10) & (2024-2026)
3.6 New Products and Potential Entrants
3.7 Market M&A Activity & Strategy

4 WORLD HISTORIC REVIEW FOR CONVENTIONAL GM CRYOCOOLERS BY GEOGRAPHIC REGION

4.1 World Historic Conventional GM Cryocoolers Market Size by Geographic Region (2021-2026)
4.1.1 Global Conventional GM Cryocoolers Annual Sales by Geographic Region (2021-2026)
4.1.2 Global Conventional GM Cryocoolers Annual Revenue by Geographic Region (2021-2026)
4.2 World Historic Conventional GM Cryocoolers Market Size by Country/Region (2021-2026)
4.2.1 Global Conventional GM Cryocoolers Annual Sales by Country/Region (2021-2026)
4.2.2 Global Conventional GM Cryocoolers Annual Revenue by Country/Region (2021-2026)
4.3 Americas Conventional GM Cryocoolers Sales Growth
4.4 APAC Conventional GM Cryocoolers Sales Growth
4.5 Europe Conventional GM Cryocoolers Sales Growth
4.6 Middle East & Africa Conventional GM Cryocoolers Sales Growth

5 AMERICAS

5.1 Americas Conventional GM Cryocoolers Sales by Country
5.1.1 Americas Conventional GM Cryocoolers Sales by Country (2021-2026)
5.1.2 Americas Conventional GM Cryocoolers Revenue by Country (2021-2026)
5.2 Americas Conventional GM Cryocoolers Sales by Type (2021-2026)
5.3 Americas Conventional GM Cryocoolers Sales by Application (2021-2026)
5.4 United States
5.5 Canada

I would like to order

Product name: Global Conventional GM Cryocoolers Market Growth 2026-2032

Product link: https://marketpublishers.com/r/G0D995363AFCEN.html

Price: US$ 3,660.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page https://marketpublishers.com/r/G0D995363AFCEN.html
