The global Cooking Knives market size is predicted to grow from US\$ 1575 million in 2025 to US\$ 2145 million in 2031; it is expected to grow at a CAGR of 5.3% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

A Cooking Knife is any knife that is intended to be used in food preparation. While much of this work can be accomplished with a few general-purpose knives – notably a large chef's knife, a tough cleaver, and a small paring knife – there are also many specialized knives that are designed for specific tasks. Kitchen knives can be made from several different materials.

The cooking knife market is a market related to the food industry and home kitchens, and its development is influenced and driven by multiple factors. Here are some of the key market drivers:

Culinary culture and food trends: Interest in food and cooking continues to increase, and many people are willing to invest in high-quality cooking tools, including knives. This culture is fueled by food shows, cookbooks and food content on social media.

Catering Industry Growth: The growth of the quick-service, restaurant and food service industries has prompted professional chefs and caterers to seek high-quality knives to improve cooking efficiency and food quality.

Home Cooking Trends: More and more people are choosing to cook at home, which is driving the demand for high-quality knives. People are willing to invest in knives to

improve their cooking skills and create delicious home dishes.
