Cool Roof and Wall Panels refer to high-performance, factory-fabricated panels designed for building envelopes, characterized by inherent high Solar Reflectance and high Thermal Emittance. These panels are typically made from metals or composite materials and are finished with specialized light-colored or cool-pigment coatings. The cool panels efficiently reflect solar radiation, significantly minimizing the heat gain into the structure. They are widely utilized in commercial, industrial, and prefabricated buildings to enhance the thermal performance of the building shell, reduce the demand for air conditioning, and serve as both an aesthetically pleasing and energy-efficient solution for facades and roofing.

United States market for Cool Roof and Wall Panels is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
