Corded Hair Dryer is an electrical device used for drying and styling hair. It consists of a handheld unit with a heating element and a motor that blows out hot air to accelerate the drying process. Unlike cordless hair dryers that operate on rechargeable batteries, a corded hair dryer is powered by an electrical cord that needs to be plugged into a power outlet for operation.

As a personal care and beauty tool, hair dryers have a wide market demand worldwide. People's emphasis on personal image and pursuit of efficiency have promoted the growth of the hair dryer market. The hair dryer can not only help dry hair quickly, but also achieve various styling needs through different wind power and temperature settings, meeting users' needs for beautiful and comfortable hairstyles.
